Ministry of Water, Land and Air Protection

CORRECTIONS ISSUED FOR FRESHWATER FISHING GUIDE

VICTORIA – Anglers should be aware that an error has been found in the 2003-2004 Freshwater Fishing Regulations Synopsis published by the Ministry of Water, Land and Air Protection.

The error identified is on page 31, where dots that refer to special restrictions on a number of Vancouver Island streams are missing from three columns in the table.

As a result, closure information for the following eight streams needs to be clarified: Toquart River, Trent River, Tsable River, Tsitika River, Tsolum River, Walpeeto Creek, White River and Zeballos River.

Beginning April 1, anglers may obtain the corrected information notice by picking up the Erratum Notice: Page 31 - Region 1 Table, 2003-2004 Freshwater Fishing Regulations from any freshwater fishing license vender or any Government Agent office.

The information will also be available at <http://wlapwww.gov.bc.ca> online. Click on Fishing Regulations Synopsis under Popular Topics, then click on the synopsis cover photo, scroll down to In-Season Regulation Changes, and click on Region 1 – Vancouver Island.
