

INSURANCE CORPORATION OF BRITISH COLUMBIA
CONSOLIDATED FINANCIAL STATEMENTS
AS AT MARCH 31, 2017

Management's Responsibility for Financial Statements

Scope of Responsibility

Management prepares the accompanying consolidated financial statements and related information and is responsible for their integrity and objectivity. The statements are prepared in conformity with International Financial Reporting Standards. These consolidated financial statements include amounts that are based on management's estimates and judgements, particularly our reserves for unpaid claims. We believe that these statements present fairly ICBC's financial position, results of operations and cash flows, and that the other information contained in the annual report is consistent with the consolidated financial statements.

Internal Controls

We maintain and rely on a system of internal accounting controls designed to provide reasonable assurance that assets are safeguarded and transactions are properly authorized and recorded. The system includes written policies and procedures, an organizational structure that segregates duties, and a comprehensive program of periodic audits by the internal auditors, who independently review and evaluate these controls. There is a quarterly risk assessment process, the results of which influence the development of the internal audit program. We continually monitor these internal accounting controls, modifying and improving them as business conditions and operations change. Policies that require employees to maintain the highest ethical standards have also been instituted. We recognize the inherent limitations in all control systems and believe our systems provide an appropriate balance between costs and benefits desired. We believe our systems of internal accounting controls provide reasonable assurance that errors or irregularities that would be material to the financial statements are prevented or detected in the normal course of business.

Board of Directors and Audit Committee

The Audit Committee, composed of members of the Board of Directors, oversees management's discharge of its financial reporting responsibilities. The Committee recommends for approval to the Board of Directors the appointment of the external auditors and the external actuaries. The Committee meets no less than quarterly with management, our internal auditors and representatives of our external auditors to discuss auditing, financial reporting and internal control matters. The Audit Committee receives regular reports on the internal audit results and evaluation of internal control systems and it reviews and approves major accounting policies including alternatives and potential key management estimates or judgments. Both internal and external auditors and the appointed actuary have access to the Audit Committee without management's presence. The Audit Committee has reviewed these financial statements prior to recommending approval by the Board of Directors. The Board of Directors has reviewed and approved the financial statements.

Independent Auditor and Actuary

Our independent auditor, PricewaterhouseCoopers LLP, have audited the financial statements. Their audit was conducted in accordance with Canadian generally accepted auditing standards, which includes the consideration of our internal controls to the extent necessary to form an independent opinion on the financial statements prepared by management.

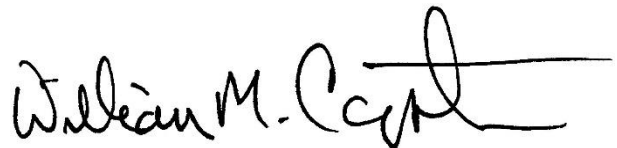

William T. Weiland of Eckler Ltd. is engaged as the appointed actuary and is responsible for carrying out an annual valuation of ICBC's policy liabilities which include a provision for claims and claims expenses, unearned premiums and deferred premium acquisition costs. The valuation is carried out in accordance with accepted actuarial practice and regulatory requirements. In performing the evaluation, the appointed actuary makes assumptions as to the future rates of claims frequency and severity, inflation, reinsurance recoveries and expenses taking into consideration the circumstances of ICBC and the insurance policies in force. The appointed actuary, in his verification of the underlying data used in the valuation, also makes use of the work of the external auditor.

Mr. Weiland meets every year with PricewaterhouseCoopers' valuation actuaries and ICBC's management to discuss business developments, changes in claims processing and claims trends. These discussions assist the independent parties in developing expectations around and assessing management's estimate of the claims provision.

Independent Auditor's Report

Minister Responsible for the Insurance Corporation of British Columbia and The Board of Directors for the Insurance Corporation of British Columbia

We have audited the accompanying consolidated financial statements of the Insurance Corporation of British Columbia and its subsidiaries, which comprise the consolidated statement of financial position as at March 31, 2017 and the consolidated statements of comprehensive income, changes in equity and cash flows for the 15 month period then ended, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Insurance Corporation of British Columbia and its subsidiaries as at March 31, 2017 and their financial performance and their cash flows for the 15 month period then ended in accordance with International Financial Reporting Standards.

PricewaterhouseCoopers LLP

Chartered Professional Accountants

Actuary's Report

I have valued the policy liabilities, including reinsurance recoverables, in the consolidated statement of financial position of the Insurance Corporation of British Columbia as at March 31, 2017 and their changes in its consolidated statement of comprehensive loss for the 15 month period ended in accordance with accepted actuarial practice in Canada, including selection of appropriate assumptions and methods.

In my opinion, the amount of the policy liabilities, including reinsurance recoverables, makes appropriate provision for all policy obligations, and the consolidated financial statements fairly present the results of the valuation.

Notes to Consolidated Financial Statements

For the 15 month period ended March 31, 2017

1. Corporate Information

The Insurance Corporation of British Columbia (the Corporation) is a wholly-owned Crown corporation of the Province of B.C., not subject to income taxes under the *Income Tax Act (Canada)*, incorporated in 1973 and continued under the *Insurance Corporation Act, R.S.B.C. 1996 Chapter 228*. The head office of the Corporation is 151 West Esplanade, North Vancouver, British Columbia. The Corporation operates and administers plans of universal compulsory vehicle insurance (Basic) and optional vehicle insurance as set out under the *Insurance (Vehicle) Act*, and is also responsible for non-insurance services under the *Insurance Corporation Act* and the *Motor Vehicle Act*. Non-insurance services include driver licensing, vehicle registration and licensing, violation ticket administration and government fines collection. As a result of amendments to the *Insurance Corporation Act* in 2003, the Corporation is subject to regulation by the British Columbia Utilities Commission (BCUC) with respect to universal compulsory vehicle insurance rates and services (note 22).

Basic insurance includes the following coverages: \$200,000 third party liability protection (higher for some commercial vehicles), access to accident benefits including a maximum of \$150,000 for medical and rehabilitation expenses and up to \$300 per week for wage loss, \$1,000,000 underinsured motorist protection, and also protection against uninsured and unidentified motorists within and outside the Province of B.C. The Corporation also offers insurance in a competitive environment (Optional), which includes, but is not limited to, the following coverages: extended third party liability, comprehensive, collision, and loss of use. The Corporation's Basic and Optional insurance products are distributed by approximately 900 independent brokers located throughout the Province of B.C. The Corporation has the power and capacity to act as an insurer and reinsurer in all classes of insurance; however, the Corporation currently only acts as a vehicle insurer.

In January 2016, the Corporation's Board of Directors approved a change to the Corporation's fiscal year-end from December 31 to March 31 to align with the Province of B.C.'s March 31 fiscal year-end date. This was followed by a change to the *Insurance Corporation Act* effective March 10, 2016 setting the Corporation's fiscal year-end at March 31. These consolidated financial statements represent the first complete fiscal period subsequent to this decision. To transition to the new fiscal year-end, the current period includes the 15 months ended March 31, 2017, with comparative financial statements for the 12 months ended December 31, 2015. As a result, information contained in these consolidated financial statements may not be comparable.

These consolidated financial statements have been authorized for issue by the Board of Directors on June 8, 2017.

2. Summary of Significant Accounting Policies

The significant accounting policies applied in preparation of these consolidated financial statements are set out below. They have been prepared under the historical cost convention, as modified by the revaluation of certain financial assets at fair value. These policies have been consistently applied to all periods presented, unless otherwise stated.

a) Basis of reporting

The consolidated financial statements of the Corporation have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and required by the *Budget Transparency and Accountability Act*. The consolidated financial statements include the accounts of the Corporation and its subsidiary companies. The Corporation's reporting currency and functional currency for all of its operations is the Canadian dollar, unless otherwise stated.

The Corporation reports revenues and expenses attributable to Basic insurance separately from the other operations of the Corporation (note 22). The Corporation presents investment income separately from underwriting results as this reflects how the business operations are managed and provides more relevant, reliable, comparable and understandable information of these consolidated financial statements and reflects the Corporation's results from underwriting activities and investment activities. The Corporation also provides a number of non-insurance services on behalf of the Province of B.C. The costs associated with these non-insurance activities are borne by the Corporation. The amounts collected and remitted as well as the related costs are accounted for and disclosed separately in the consolidated statement of comprehensive loss under non-insurance operations for greater transparency (note 19). During the period, the Corporation changed its consolidated statement of cash flows to the indirect method due to preparation efficiency and is a more commonly used financial reporting practice (note 23).

The preparation of consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Corporation's accounting policies. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are disclosed in note 3.

b) Basis of consolidation

Control

The Corporation consolidates the financial statements of all subsidiary companies over which it has control. Control is achieved when the Corporation has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Entities are fully consolidated from the date on which control is transferred to the Corporation. All but two of the Corporation's investment properties are held individually in fully-owned nominee holding companies. The Corporation does not have any active operating subsidiary companies. All inter-company transactions and balances are eliminated.

Non-controlling interest (NCI), presented as part of equity, represents the portion of an entity's profit or loss and net assets that are not attributable to the Corporation. The

Corporation attributes total comprehensive income or loss of entities between the parent and the NCI based on their respective ownership interests. All subsidiaries are wholly-owned except for a few, which are Canadian limited partnerships (note 6).

When the Corporation loses control over an entity, it derecognizes the assets and liabilities of the entity, and any related NCI and other components of equity. Any resulting gain or loss is recognized in profit or loss. Any interest retained in the entity is measured at fair value when control is lost.

In 2015, the Corporation had control of one Canadian equity pooled fund investment (the Fund). The Fund was fully consolidated, with the NCI portion attributed to NCI within equity. In May 2016, the Corporation ceased to control the Fund (note 6).

Significant influence

Associates are entities over which the Corporation has significant influence, which means it has the power to participate in the financial and operating decisions of the investee but does not have control or joint control over the financial or operating policies. Associates generally involve a shareholding of 20% to 50% of the voting rights. In some cases, voting rights in themselves are not sufficient to assess power or significant influence over the relevant activities of the investee. In such cases, judgment is applied through the analysis of management agreements, the effectiveness of voting rights, the significance of the benefits to which the Corporation is exposed and the degree to which the Corporation can use its power or significant influence to affect its returns from investees. Associates are accounted for using the equity method. The Corporation has determined that it does not have significant influence in an investment in a limited partnership for real estate (note 3d), thus the investment is not classified as an associate.

Joint operation

The Corporation accounts for its interest in joint operations by recognizing its share of assets, liabilities, revenues and expenses in accordance with its contractually conferred rights and obligations. The Corporation owns 50% share of each of its three joint operations, one of which is with a Limited Partner. All joint operations are investment properties in Canada.

c) Service fees

Service fees on the Corporation's payment plan are recognized monthly over the term of the policy. For six or twelve month term Autoplan policies, the Corporation's payment plan enables customers to make monthly or quarterly payments. The related interest bearing receivables are carried at amortized cost as determined using the effective interest method.

d) Insurance contracts

The Corporation issues insurance contracts that transfer insurance risk which results in the possibility of having to pay benefits on the occurrence of an insured event. The Corporation accounts for insurance contracts as follows:

Premiums earned

The Corporation recognizes vehicle premiums on a straight-line basis over the term of each vehicle policy written. Driver premiums are earned over 12 months. Unearned premiums are the portion of premiums relating to the unexpired term, net of any premium refunds.

Deferred premium acquisition costs

To the extent premium acquisition costs such as commissions and premium taxes are recoverable from unearned premiums, they are deferred and amortized to income over the term of the related policies. An actuarial evaluation is performed to determine the amount allowable for deferral. The method followed in determining the deferred costs limits the amount of the deferral to the amount recoverable from unearned premiums, after giving consideration to the investment income, claims costs, and adjustment expenses expected to be incurred as the premiums are earned. A premium deficiency exists when future claims and related expenses are expected to exceed unearned premiums. When this occurs, the premium deficiency is recognized as a liability and any deferred premium acquisition costs are written down.

Provision for unpaid claims

The provision for unpaid claims represents the estimated amounts required to settle all unpaid claims. It includes amounts for claims that are incurred but not reported (IBNR) plus development on known case reserves and loss adjustment expenses, and is gross of recoveries from reinsurance. The provision for unpaid claims is established according to accepted actuarial practice in Canada. It is carried on a discounted basis and therefore reflects the time value of money, and includes a provision for adverse deviations (PfAD).

As with any insurance company, the provision for unpaid claims is an estimate subject to volatility, which could be material in the near term. The estimation of claims development involves assessing the future behaviour of claims, taking into consideration the consistency of the Corporation's claims handling procedures, the amount of information available, and historical delays in reporting claims. In general, the more time required for the settlement of a group of claims, the more variable the estimates will be. Variability can be caused by receipt of additional information, significant changes in the average cost or frequency of claims over time, significant changes in the Corporation's claims operations, the timing of claims payments, and future rates of investment return.

The ultimate cost of long settlement term claims is particularly challenging to predict for several reasons, which include some claims not being reported until many years after a policy term, or changes in the legal environment, case law or legislative amendments. The Corporation is subject to litigation arising in the normal course of conducting its insurance business, which is taken into account in establishing the provision for unpaid claims and other liabilities. Provisions for such liabilities are established by examining the facts of tendered claims and are adjusted in the aggregate for ultimate loss expectations based upon historical experience patterns, current socio-economic trends and structured settlements provided in the form of consistent periodic payments as opposed to lump-sum payments.

To recognize the uncertainty in establishing best estimates, as set out in the Standards of Practice of the Canadian Institute of Actuaries, the Corporation includes a PfAD, consisting

of three elements: an interest rate margin, a reinsurance margin, and a claims development margin. The interest rate margin reduces the expected investment rate of return used for discounting to make allowance for i) asset liability mismatch risk, ii) uncertainty in the timing of claims settlement, and iii) credit risk within the investment portfolio. The reinsurance margin makes allowance for the collectability of recoverable amounts from reinsurers and is a reduction in the expected amount of reinsurance recoverable. The claims development margin makes allowance for the various factors that can create greater uncertainty in the estimates of ultimate claims costs, including i) changes in the Corporation's operations (e.g. claims practices), ii) the underlying data upon which the unpaid claims estimates are based, and iii) the nature of the lines of business written. The claims development margin is a percentage of the unpaid claims, gross of reinsurance, and is larger for injury lines that generally require more time for claims to settle and close.

The Corporation also assesses the adequacy of its insurance liabilities at the end of each reporting period to ensure that they are sufficient to cover expected future cash flows. All changes to the estimate since the end of the last reporting period are recorded in the current period as a 'Change in estimates for losses occurring in prior periods'. Methods of estimation have been used which the Corporation believes produce reasonable results given current information.

Reinsurance

Reinsurance balances are presented separately on the consolidated statement of financial position to indicate the extent of credit risk related to reinsurance and its obligations to policyholders, and on the consolidated statement of comprehensive loss to indicate the results of its retention of premiums written.

Reinsurance assets, including both reinsurance recoverable and reinsurance receivable, are shown on the consolidated statement of financial position. A PfAD is included in the discounted amount recoverable from reinsurers. The PfAD is applied on a consistent basis with the underlying provision for unpaid claims and includes a reinsurance recovery portion that reflects considerations relating to potential collectability issues with reinsurers.

e) Cash and cash equivalents

Cash and cash equivalents are short-term, highly liquid investments that are subject to insignificant changes in fair value, including cash on hand, deposits with financial institutions that can be withdrawn without prior notice or penalty, and money market securities with a term less than 90 days from the date of acquisition.

f) Assets held for sale

Non-current assets that are expected to be recovered primarily through sale rather than through continuing use, and the sale is considered to be highly probable, are classified as held for sale. Immediately before classification as held for sale, the assets are remeasured at cost less accumulated depreciation and impairment losses. Thereafter, the assets are measured at the lower of their carrying amount and fair value less costs to sell. Impairment losses on initial classification as held for sale and subsequent gains and losses on remeasurement are recognized in profit or loss; these gains are not recognized in excess of any cumulative impairment loss.

Once classified as held for sale, non-current assets are no longer amortized or depreciated (note 5).

g) Financial assets

The Corporation designates its financial instruments as fair value through profit or loss (FVTPL), loans and receivables (Loans) or available for sale (AFS) depending upon the purpose for which the financial assets were acquired. Monetary assets are assets that are to be received in a fixed or determinable number of units of currency. Monetary financial assets include bonds and non-monetary financial assets include equities. The Corporation's financial assets are accounted for based on their classification as follows:

Fair value through profit or loss

The Corporation's cash and cash equivalents (note 2e) and derivative financial instruments (note 2j) are accounted for as FVTPL. A financial asset is classified in this category if it is acquired principally for the purpose of selling in the short-term. The Corporation's derivative financial instruments are forward contracts that are not in a hedging relationship, which are classified as FVTPL.

FVTPL financial assets are recorded at fair value on initial recognition and for subsequent measurement. Transaction costs and changes in the fair value are recognized in investment income on the consolidated statement of comprehensive loss.

Loans and receivables

Loans are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Corporation has classified its mortgage portfolio, loan, and premiums and other receivables as Loans. The mortgage portfolio consists of mortgages and mortgage bonds. The Corporation currently has one loan to a Canadian operation to acquire a non-controlling interest in a Canadian limited partnership.

Loans are recorded at fair value on initial recognition and subsequently measured at amortized cost using the effective interest rate method. Transaction costs are included in the initial carrying amount of the assets. Impairment losses on loans are recognized in investment income on the consolidated statement of comprehensive loss.

Available for sale

Non-derivative financial assets that are not classified as Loans or FVTPL are accounted for as AFS. The Corporation has designated its money market securities with a term greater than 90 days from the date of acquisition, and its bond and equity portfolios as AFS.

AFS financial assets are recorded at fair value on initial recognition or the trade date and for subsequent measurement. Transaction costs are included in the initial carrying amount of the assets.

Changes in the fair value, other than due to foreign exchange, of an AFS financial asset are recorded in other comprehensive income (OCI), until the financial asset is disposed of or becomes impaired, at which time the gain or loss will be recognized in investment income.

Changes in the fair value due to foreign exchange on a non-monetary AFS financial asset are recorded in OCI. Changes in fair value due to foreign exchange on a monetary AFS financial asset are recorded in investment income. Interest calculated using the effective interest method is accrued daily and recognized in investment income. Dividends are recognized in investment income when the right to receive payments is established on the ex-dividend date.

Financial assets are derecognized when the rights to receive cash flows have expired or have been transferred along with substantially all of the risks and rewards of ownership.

h) Translation of foreign currencies

Foreign currency transactions are translated at exchange rates at the date of the sale or purchase. Foreign currency assets and liabilities considered as monetary items are translated at exchange rates in effect at the period end date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in investment income.

Translation differences on non-monetary AFS financial assets, such as equity securities, are recognized as part of the change in fair value in OCI until the security is disposed of or impairment is recorded. Translation differences on monetary AFS financial assets are recorded in investment income.

i) Fair value of financial assets

In accordance with IFRS 13 *Fair Value Measurement*, the Corporation defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurement is classified as Level 1, 2 or 3 based on the degree to which fair value is observable:

- Level 1 inputs to the valuation methodology are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 inputs to the valuation methodology include inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 inputs to the valuation methodology are not based on observable market data.

Where an active market does not exist, and quoted prices are unavailable, fair values are determined using valuation techniques that refer to observable market data. Where observable market data is unavailable, the estimated fair value is determined using valuation techniques.

The estimated fair value of money market securities greater than 90 days, which are not considered cash and cash equivalents, is approximated by cost. The estimated fair value for bonds and equities is based on quoted prices or on other observable market information, where available. The estimated fair value for mortgages is determined by referencing the yield curve of Government of Canada bonds to the corresponding maturity dates of the underlying mortgages, plus an estimated risk premium. The risk premium is determined by factors such as the location of the property, tenant profile, and degree of leverage of the property.

These valuations are reviewed each reporting date by management.

j) Derivative financial instruments

The Corporation uses derivative financial instruments to manage the foreign exchange risks related to its US bond portfolio (note 7).

Foreign exchange related derivative instruments that are not designated as hedges are recorded using the mark-to-market method of accounting whereby instruments are recorded at fair value as an asset or liability with changes in fair value recognized in investment income in the period of change. The related foreign exchange gains or losses on the bond portfolio are included in investment income on the consolidated statement of comprehensive loss.

k) Investment properties

Properties held for rental income or capital appreciation that are not occupied by the Corporation are classified as investment properties.

The estimated fair value of the Corporation's investment properties is based on independent appraisals by professionally qualified external valuers made during the period or on a combination of discounted cash flows using current market capitalization rates and the direct capitalization method. The estimated fair value as calculated using the direct capitalization method is determined by dividing the net operating income by the capitalization rate.

The Corporation has certain properties that serve dual purposes, investment and own-use portions. If the investment and own-use portions can be sold separately or leased out separately under a finance lease, the portions are accounted for separately. If the portions cannot be sold separately, the property is investment property only if an insignificant portion is held for own-use in the supply of services or for administrative purposes. Where the portion held for own-use is significant then it would be treated as property and equipment. The Corporation has two properties that serve dual purposes, both of which are classified as investment properties.

Investment properties comprise of land and buildings and are initially recognized at the fair value of the purchase consideration plus directly attributable costs. Subsequent to initial recognition, the investment properties are carried at cost less accumulated depreciation for the building portion and impairment, if any.

Depreciation is provided on a straight-line basis at 2.5% to 5.0% annually over the investment properties' useful life.

l) Investment-related liabilities

Investment-related liabilities include mortgage debt associated with investment properties (note 2k) and are initially recognized at fair value and subsequently measured at amortized cost.

m) Bond repurchase agreements

The Corporation participates in the sale and repurchase of Government of Canada and Provincial bonds which are sold and simultaneously agreed to be repurchased at a future date with the market repurchase rate determining the forward contract price. These sale and repurchase arrangements are accounted for as financial liabilities and are initially recognized at fair value

and subsequently measured at cost. The difference between the sale price and the agreed repurchase price on a repurchase contract is recognized as interest expense. Assets transferred under repurchase agreements are not derecognized as substantially all the risks and rewards of ownership are retained by the Corporation and a liability equal to the consideration received has been recorded.

n) Accounts payable and accrued charges

Accounts payable and accrued charges are obligations to pay for goods and services that have been acquired in the ordinary course of business from suppliers. Accounts payable and accruals are recognized initially at fair value and subsequently measured at amortized cost.

o) Provisions

Provisions are recognized when the Corporation has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. These costs are included in the accounts payable and accrued charges presented on the consolidated statement of financial position. Future operating losses are not recognized.

Where these amounts are due more than 12 months after the reporting date, they are measured at the present value of the expenditures expected to settle the obligation using a discount rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

p) Pension and post-retirement benefits

The amounts recognized in net income in respect of defined benefit pension plans and post-retirement benefits are as follows:

- The Corporation's portion of the current service costs;
- Non-investment costs;
- Interest costs;
- Past service costs; and
- Impact of any curtailment or settlements during the period.

The current service cost is equal to the present value of benefits earned by members during the reporting period.

The non-investment costs are equal to expenses paid from the plans in the reporting period relating to the administration of the plans.

The interest costs are calculated using the discount rate at the beginning of the reporting period and applied to the net liability at the beginning of the reporting period.

Past service costs arise from plan amendments that increase or decrease the obligation. Past service costs are recognized immediately in net income.

The changes in the defined benefit obligation and the changes in the fair value of plan assets that result from a curtailment or settlement of plan liabilities during the reporting period are recognized in net income.

A plan's surplus is equal to the excess, if any, of the plan's assets over its obligations. For plans in surplus, an asset is recognized on the consolidated statement of financial position to the extent that the Corporation can realize an economic benefit, in the form of a refund or a reduction in future contributions, at some point during the life of the plan or when the plan liabilities are settled. For plans in deficit, the resulting net liability is recognized on the consolidated statement of financial position.

The value recognized on the consolidated statement of financial position for each defined benefit pension plan and for post-retirement benefits is calculated at the end of the reporting period as follows:

- The defined benefit obligation of the plan;
- Less the fair value of the plan assets out of which the obligations are to be settled directly; and
- Adjusted for the net change of any surplus derecognized.

The Corporation recognizes all actuarial remeasurements in the reporting period in which they arise, through OCI on the consolidated statement of comprehensive loss.

Certain current and former employees of the Corporation who were formerly employed in the Motor Vehicle Branch are members of a separate plan, the BC Public Service Pension Plan. This is a multi-employer defined benefit plan for which the Corporation applies defined contribution accounting. Since the BC Public Service Pension Plan pools risks amongst the current and former members of many employers, there is no consistent or reliable basis for allocating the Corporation's portion of the obligation, assets, and costs. As a result, the Corporation expenses the contributions made. Contributions are subject to change in the future depending on the funded status of the plan.

q) Property and equipment

Property and equipment are initially recorded at fair value and subsequently measured at cost less accumulated depreciation and impairment losses. Cost includes expenditures that are directly attributable to the acquisition or construction of the items including retirement costs. Subsequent costs such as betterments are included in the asset only when it is probable that future economic benefits associated with the item will flow to the Corporation. All other subsequent expenditures are recognized as repairs and maintenance. Capitalized software that is an integral part of the equipment is accounted for as equipment.

Property and equipment are depreciated when they are available for use on a straight-line basis over the estimated useful life of each asset, taking into account the residual value, at the following annual rates:

- Buildings 2.5% to 10%
- Furniture and equipment 10% to 33%
- Leasehold improvements Term of the lease

The assets' residual values and useful lives are reviewed annually and adjusted, if appropriate, at each reporting date.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and recorded in net income.

r) Intangible assets

Capitalized software that is not an integral part of the equipment is accounted for as an intangible asset. Software development costs, which are comprised of labour and material costs for design, construction, testing, and other costs directly attributable to bringing the asset to a condition where it can be applied in its intended use, are capitalized for infrastructure projects expected to be of continuing benefit to the Corporation, or expensed where the potential future benefits are uncertain or not quantifiable.

Finite life intangible assets are initially recorded at fair value and subsequently carried at cost less accumulated amortization and impairment losses. Intangible assets with finite useful lives are amortized over their estimated useful lives when they are available for use on a straight-line basis at 10% to 33%, taking into account the residual value.

Indefinite life and not available for use intangible assets are not subject to amortization, but are assessed for indicators of impairment at each reporting date.

s) Impairment of assets

Impairment of financial assets

Financial assets not carried at FVTPL are assessed at each reporting date to determine if there is objective evidence of impairment such as deterioration in the financial health of the investee, industry and sector performance, changes in technology, financing and operational cash flows, and the significance of deterioration in the fair value of the asset below cost. In addition, for equity investments, a prolonged decline is also considered objective evidence of impairment. Where objective evidence of impairment exists, an impairment loss will be recognized as follows:

- For AFS financial assets, the related unrealized loss charged to OCI is reclassified to investment income.
- For Loans, the related difference between the amortized cost carrying amount and the fair value, calculated as the present value of the estimated future cash flows, directly from the loan or the sale of collateral, discounted at the asset's original effective interest rate, is recognized in investment income.

If the fair value of a previously impaired debt instrument classified as AFS or a financial asset measured at amortized cost increases and the increase can be objectively related to an event

occurring after the impairment loss was recognized, the impairment loss is reversed in investment income. Impairment losses on equity instruments are not reversed.

Impairment of non-financial assets

The Corporation's non-financial assets consist primarily of investment properties, property and equipment, and intangible assets. An impairment review is carried out at the end of each reporting period to determine if there are any indicators of impairment. When indicators of impairment exist, the Corporation assesses the asset for impairment. Investment properties are assessed for impairment as separate and identifiable cash-generating units, distinct from the other operations of the Corporation. All other assets are assessed as a group as their cash flows are generated from the operations of the Corporation. If an asset is impaired, the Corporation's carrying amount is written down to its estimated recoverable amount when material. Recoverable amount is the higher of fair value less costs to sell and value in use. Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date. If there is a change in estimate of the recoverable amount, an impairment loss is reversed to net income only to the extent that the asset's carrying value does not exceed the carrying value that would have been determined, net of depreciation, if no impairment loss had been recognized.

t) Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to net income on the consolidated statement of comprehensive loss on a straight-line basis over the period of the lease. Where substantially all of the risks and rewards have been transferred to the lessee, the lease is classified as a finance lease. In these cases, an obligation and an asset are recognized based on the present value of the future minimum lease payments and balances are amortized over the lease term or useful life, as applicable.

u) Current and non-current classification of assets and liabilities

Assets are classified as current when expected to be realized within one year of the reporting date. Liabilities are classified as current when expected to be settled within one year of the reporting date. All other assets and liabilities are classified as non-current.

v) Restricted Cash

Restricted cash includes cash balances which the Company does not have immediate access to as they have been pledged to counterparties as security for investments or trade obligations. These balances are available to the Company only upon settlement of the trade obligations for which they have been pledged as security.

3. Critical Accounting Estimates and Judgments

The Corporation makes estimates and judgments that affect the reported amounts of assets and liabilities. These are continually evaluated and based on historical experience and other facts, including expectations of future events that are believed to be reasonable under the circumstances. Management believes its estimates and judgments to be appropriate; however, actual results may be materially different and would be reflected in future periods.

Significant accounting estimates and judgments include:

a) Actuarial methods and assumptions

The Corporation typically employs three standard actuarial methods to analyze the ultimate claims costs, augmented by more in-depth analyses as needed:

- The incurred development method;
- The paid development method; and
- The Bornhuetter-Ferguson method.

The standard methods call for a review of historical loss and count development patterns. As part of this review, the Corporation calculates loss and count development factors, which represent the period-to-period changes in a given loss year's incurred loss amount. Based on an examination of the loss development factors, the Corporation's Chief Actuary selects a best estimate of development factors that forecast future loss development.

The loss and count development factors rely on a selected baseline. The baseline for the majority of the coverages is the average of the most recent four loss years. The use of a baseline helps maintain consistency in the loss and count development factors from one reserve review to another. Circumstances may arise when the standard methods are no longer appropriate to use. In these cases, and in accordance with accepted actuarial practice, modifications to the methods are made or alternative methods are employed that are specific and appropriate to the circumstances. Circumstances may include a change in the claims settlement environment, a change in the handling or reserving of claims, or an emerging trend in the statistical data used in the analysis.

An additional method is employed to address the increasingly complex bodily injury claims environment, which includes a growing legal representation rate, a shifting frequency mix of bodily injury claims by severity of injury, and a slowdown in the settlement of claims. This additional method used legal status and severity of injury to separate bodily injury claims data into segments of similar complexity and is based on the Adler-Kline claim closure model. It has allowed the Corporation's Chief Actuary to capture changes in the claim settlement rates within each segment, and changes in the mix of claims by segment, which impacts the bodily injury severity trend rate.

The timing of when the unpaid ultimate claims costs will be paid depends on both the line of business and historical data. Bodily injury lines of business generally take longer to settle than the material damage claims and exhibit greater variability as to the timing and amount ultimately paid to settle a claim. Historical patterns of claims payment data are used to estimate the future claims payment pattern. Expected future paid amounts are then discounted, using the discounted

cash flow method, to determine a present value as of the reporting date. The discount rate is based upon the expected return on the Corporation's current investment portfolio, the expected asset default risk of its investment portfolio, and assumptions for interest rates relating to reinvestment of maturing investments. These estimates are based on current market returns as well as expectations about future economic and financial developments.

A PfAD is then added to the estimate to recognize sources of uncertainty in the assumptions behind the provision for unpaid claims (note 2d). The PfAD is calculated according to accepted actuarial practice in Canada (note 13).

b) Impairment of financial assets

Judgment is required to determine if there is objective evidence of impairment for financial assets. The Corporation evaluates, among other factors, the financial health of the investee, industry and sector performance, changes in technology, financing and operational cash flows, and the significance of deterioration in the fair value of the asset below cost. In addition, for equity investments a prolonged decline is also considered objective evidence of impairment (note 10).

c) Pension and post-retirement benefits

The cost of pension and post-retirement benefits earned by employees is actuarially determined using the Projected Unit Credit Method and management's best estimate of future compensation levels and healthcare costs.

The key assumptions used in calculating the cost of pension and post-retirement benefits are the discount rate, rate of compensation increase, inflation rate, life expectancies, Medical Services Plan trends, and extended healthcare cost trends. Together with plan member data, these and other assumptions are used to estimate future benefit eligibility, amount and duration of payments. The rate determined for each of the key assumptions is disclosed in note 16.

The discount rate is used to calculate the present value of the expected future benefit payments and to calculate interest on the net liability. The discount rate is based on high-grade corporate bond yields at the measurement date.

The rate of compensation increase reflects individual job progression, general price level increases, productivity, seniority, promotion, and other factors.

The inflation rate assumption is based on an assessment of historical data, the Bank of Canada target inflation range and the inflation expectations implied by the Government of Canada nominal and real return long-term bond yields.

Life expectancies are based on Canadian mortality tables, and contain a provision for future longevity improvements.

The Medical Services Plan trend rate is based on expected increases reflected in the provincial budget. The future potential cuts to Medical Service Premiums announced on February 21, 2017 as part of the 2017 B.C. provincial pre-election budget have not been reflected.

The extended healthcare trend rate is based on an analysis of plan experience, assumptions about the trend in total healthcare costs, and the proportion that will be covered by private plans.

With the exception of the discount rate, which is based on market conditions at the financial statement date, all other assumptions are management's best estimate (note 16).

d) Significant influence

The Corporation owns more than 20% of the nominal voting interests in an investment in a limited partnership for real estate. The factors the Corporation considered in making the determination that the Corporation does not have significant influence include the following:

- Each limited partner does not have control or power over the operations of this investment;
- The Corporation does not have voting power in the investment;
- The Investment Committee of this investment is responsible for overseeing the investing activities. The Corporation does not have any influence over the Investment Committee; and
- Although the Corporation has one of five seats on the Governance Committee, the Governance Committee itself has no power over the Investment Committee. The role of the Governance Committee is to provide protective rights and is to ensure the investments are compliant with the Statement of Investment Policy. Further, the Governance Committee does not have any influence over the investing activities or over the management and operation of the partnership.

e) Deferred Premium Acquisition Costs

IFRS 4 *Insurance Contracts* specifies “the financial reporting for insurance contracts by any entity that issues such contracts until the Board completes the second phase of its project on insurance contracts”. Until the new Insurance Contracts IFRS standard becomes effective, insurance companies follow the current IFRS 4 standard for reporting/disclosure guidelines and the former Canadian Generally Accepted Accounting Principles (GAAP) Accounting Guideline (AcG) 3 *Financial Reporting by Property & Casualty Insurance Companies*. AcG-3.6 states that Deferred Premium Acquisition Costs (DPAC) should be determined by reasonable groupings of business, consistent with an insurer's manner of acquiring, servicing and measuring the profitability of its business. Judgment is required to determine what would qualify as reasonable groupings of business.

Previously, Basic and Optional insurance were viewed as two separate lines of business: rates for each line were set independent of each other; profitability of each line was viewed independently; there were no income transfers between the lines of business; management of pricing and risks related to Basic and Optional insurance being separate business groupings. Therefore, they were classified as two business groupings under AcG-3.

Income transfers have now been initiated from Optional to Basic insurance to help keep Basic insurance rates as low as possible (note 22). Therefore, management has now determined that, effective January 1, 2016, a reasonable grouping of business is considered to be at the combined

Corporate level. This results in calculating DPAC at a combined Corporate level as opposed to separate calculations for Basic and Optional insurance (note 18).

4. New Accounting Pronouncements

a) Standards and interpretations effective for the period ended March 31, 2017

The Corporation has adopted the standards and interpretations that are relevant to the operations of the Corporation and effective for the 15 month period ended March 31, 2017. There were no material impacts from the adoption of new standards.

b) Standards and interpretations issued but not yet effective and not early adopted

Standards and interpretations issued that are relevant to the operations of the Corporation, but not yet effective include:

- **IFRS 9 *Financial Instruments*.** Effective for annual periods beginning on or after January 1, 2018; early adoption is permitted. IFRS 9 brings together the classification and measurement, impairment and hedge accounting to replace IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 introduces a principles-based approach to the classification of financial assets based on an entity's business model and the nature of the cash flows of the asset. All financial assets, including hybrid contracts, are measured at FVTPL, fair value through OCI or amortized cost. For financial liabilities, IFRS 9 includes the requirements for classification and measurement previously included in IAS 39. IFRS 9 also introduces an expected loss impairment model for all financial assets at amortized costs. The model has three stages: (1) on initial recognition, 12-month expected credit losses are recognized in profit or loss and a loss allowance is established; (2) if credit risk increases significantly and the resulting credit risk is not considered to be low, full lifetime expected credit losses are recognized; and (3) when a financial asset is considered impaired, interest revenue is calculated based on the carrying amount of the asset, net of the loss allowance, rather than its gross carrying amount. Finally, IFRS 9 introduces a new hedge accounting model that aligns the accounting for hedge relationships more closely with an entity's risk management activities, permits hedge accounting to be applied more broadly to a greater variety of hedging instruments and risks and requires additional disclosures. The Corporation will defer the implementation of IFRS 9 until its fiscal period beginning April 1, 2021, as allowed under the amendments to IFRS 4 *Insurance Contracts* outlined below.
- **IFRS 4 (Amendment) *Insurance Contracts*.** Effective for annual periods beginning on or after January 1, 2018. The amendments introduce two approaches to address concerns about the differing effective dates of IFRS 9 *Financial Instruments* and the forthcoming new insurance contracts standard: the overlay approach and the deferral approach. The overlay approach provides an option for all issuers of insurance contracts to adjust profit or loss for eligible financial assets by removing any additional accounting volatility that may arise from applying IFRS 9 before the new insurance contracts standard. The deferral approach provides companies whose activities are predominantly related to insurance an optional temporary exemption from applying IFRS 9 until January 1, 2021. By adopting the new insurance standard and IFRS 9 conjunctively, there will not be any

unintended interactions that may result from accounting mismatches. The Corporation will defer IFRS 9 until the fiscal period beginning April 1, 2021. The Corporation will be evaluating the impact of this amendment on its consolidated financial statements.

- **IFRS 15 *Revenue Recognition*.** Effective for annual periods beginning on or after January 1, 2018; early adoption is permitted. The standard establishes a comprehensive framework for determining how much and when revenue is recognized. It replaces existing revenue recognition guidance. IFRS 15 contains a scope exception which excludes insurance contracts within the scope of IFRS 4. The Corporation has performed an impact analysis and does not expect the standard to have a material impact to the consolidated financial statements.
- **IFRS 17 *Insurance Contracts*.** Effective for annual periods beginning on or after January 1, 2021. Early adoption is permitted for entities that apply IFRS 9 and IFRS 15 on or before the initial application of IFRS 17. The standard establishes the principles of recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4. The standard was issued in May 2017 and requires all insurance contracts to be accounted for in a consistent manner, benefiting both investors and insurance companies. Insurance obligations will be accounted for using current values, instead of historical cost. The information will be updated regularly, providing more useful information to users of financial statements. The Corporation will be evaluating the impact of this standard on its consolidated financial statements.
- **IFRS 16 *Leases*.** Effective for annual periods beginning on or after January 1, 2019; early adoption permitted. IFRS 16 was issued in January 2016 and is intended to replace IAS 17 *Leases*, and related IFRICs. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessor accounting will remain largely unchanged with previous classifications of operating and finance lease being maintained. The Corporation is in the process of evaluating the impact of this standard on its consolidated financial statements.
- **IAS 7 (Amendment) *Statement of Cash Flows*.** Effective for annual periods beginning on or after January 1, 2017. A disclosure initiative amendment to IAS 7 was issued in January 2017 to add additional disclosure requirements regarding changes in liabilities arising from financing activities. As the amendments are for additional disclosure only, the adoption of these amendments is not expected to have a material impact to the Corporation's consolidated financial statements.
- **IAS 40 (Amendment) *Investment Properties*.** Effective for annual periods beginning on or after January 1, 2018. The amendment clarified that to transfer to, or from, investment properties there must be a change in use. To conclude if a property has changed use there should be an assessment of whether the property meets the definition. This change must be supported by evidence. A change in intention, in isolation, is not enough to support a transfer. The adoption of this amendment is not expected to have a material impact to the Corporation's consolidated financial statements.

The Corporation has not early adopted these standards.

5. Investments

Total equities		2,503,758	2,531,803
Total financial investments		\$ 14,411,033	\$ 13,946,347
Non-current portion		\$ 13,729,682	\$ 12,978,381

The Corporation's investment in pooled funds are denominated 100.0% (2015 – 100.0%) in Canadian dollars. The above disclosure presents the Corporation's interest in pooled funds by looking through the funds, and classifying by the location of issue of the underlying investments.

Money market securities, bonds, and equities are carried at their fair value. Mortgages and other loan are measured at amortized cost and have an estimated fair value of \$1.78 billion (2015 – \$1.78 billion). The fair value of mortgages is determined to be consistent with Level 3 investments based on the inputs to the valuation technique used (note 2i). The fair value of the mortgages is determined by applying a discount rate ranging from 2.2% to 4.6% (2015 – 2.1% to 3.9%).

Pooled funds

The Corporation invests in several pooled funds; the investment strategies of some of these funds include the use of leverage. As at March 31, 2017, the Corporation's interests range from 8.7% to 94.1% (2015 – 20.4% to 95.7%) of the net assets of the respective funds. The funds are managed by unrelated asset managers. The Corporation holds redeemable units in each of the pooled funds that entitle the holder to a proportional share in the respective fund's net assets. The carrying value of the Corporation's investments in pooled funds as at March 31, 2017 is \$1.88 billion (2015 – \$2.35 billion).

Pooled fund investments are included in financial investments as equities. The change in fair value of each pooled fund is included in the OCI section within the consolidated statement of comprehensive loss in 'Net change in available for sale financial assets'.

The Corporation's maximum loss exposure from its interests in the pooled funds is equal to the total fair value of these investments.

Asset-backed securities

The Corporation purchases bonds that are secured by various assets as part of its investment strategy. The majority of the bonds are issued by Canadian corporate entities and are secured by credit card, auto, or equipment receivables. The Corporation invests mainly in securitization trusts with AAA rated securities that have a first lien on assets and have no exposure to junior or subordinate tranches. The weighted-average duration of the asset-backed securities in the Corporation's portfolio is 2.5 years (2015 – 2.5 years) and the coupon interest rates range from 1.2% to 2.8% (2015 – 1.1% to 3.5%).

As at March 31, 2017, the carrying value of asset-backed securities included in financial investments in the consolidated statement of financial position is \$482.9 million (2015 – \$495.2 million). This amount also represents the maximum exposure to losses at that date.

The Corporation also has mortgage backed securities with a carrying value of \$72.5 million (2015 – \$74.3 million) with an estimated fair value of \$76.5 million (2015 – \$79.0 million). These mortgage bonds are included in financial investments as mortgages and each bond is secured by a first priority mortgage charge on a Class A real estate property. The fixed interest rates on the mortgage backed securities range from 3.0% to 4.9% (2015 – 3.0% to 4.9%) and the mortgages will mature between one to seven years.

b) Investment properties

The movement in the carrying value of investment properties is as follows:

(\$ THOUSANDS)	March 31 2017	December 31 2015
Cost		
Balance, beginning of period	\$ 874,357	\$ 703,786
Additions	320,000	159,255
Capital improvements	9,677	5,660
Reclassification	(34,225)	-
Acquisitions in progress	412	3,092
Impairment reversal	1,345	2,564
Balance, end of period	1,171,566	874,357
Accumulated depreciation		
Balance, beginning of period	102,174	84,965
Depreciation	29,356	17,209
Reclassification	(8,513)	-
Balance, end of period	123,017	102,174
Carrying value, end of period	\$ 1,048,549	\$ 772,183

The fair value of investment properties is \$1.35 billion (2015 – \$1.03 billion) and has been categorized as a Level 3 investment based on the inputs to the valuation technique used. As at March 31, 2017 and December 31, 2015, the estimated fair value is based on independent appraisals, either full appraisals or interim update appraisals, by professionally qualified external valuers.

Two investment properties were reclassified to assets held for sale as the Corporation has entered into contracts to sell these properties in the next fiscal period.

c) Lease income

The Corporation leases out its investment properties. As of March 31, 2017, the future minimum lease income under non-cancellable leases over the next five years and beyond is as follows:

(\$ THOUSANDS)	March 31 2017		December 31 2015	
	Lease Income	Net Present Value	Lease Income	Net Present Value
Up to 1 year	\$ 60,576	\$ 58,955	\$ 49,785	\$ 48,354
Greater than 1 year, up to 5 years	155,688	142,522	136,376	124,285
Greater than 5 years	104,611	88,897	73,921	58,737
	\$ 320,875	\$ 290,374	\$ 260,082	\$ 231,376

6. Entities with Non-Controlling Interest (NCI)

The following table presents the summarized financial information for the NCI in the Corporation's Canadian limited partnership subsidiaries. The amounts disclosed are based on those amounts included in the consolidated financial statements before inter-company eliminations. In 2015, the table represents NCI for the Corporation's Canadian limited partnership subsidiary and the Fund.

In May 2016, the Corporation ceased to control the Fund. The Fund is no longer consolidated and the Corporation's remaining ownership is measured at fair value and recorded as an equity investment. A gain of \$32.5 million was recorded as investment income as a result of the cessation of control (note 10).

(\$ THOUSANDS)	Canadian Limited Partnership I	Canadian Limited Partnership II	Canadian Pooled Fund	Total
March 31, 2017				
NCI percentage	10.0%	10.0%	0.0%

7. Financial Assets and Liabilities

a) Fair value hierarchy

The following table presents the fair value hierarchy for financial assets and liabilities measured at fair value in the consolidated statement of financial position. During fiscal 2016/17 and 2015, there were no transfers between Level 1, Level 2 and Level 3. The Corporation's policy is to recognize transfers into and out of fair value hierarchy levels as of the date of the event or change in circumstances that caused the transfer.

(\$ THOUSANDS)	Fair Value Measurements at Reporting Date			
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
March 31, 2017				
Cash	\$ 27,128	\$ -	\$ 27,128	\$ -
Money market securities	202,991	-	202,991	-
Bonds	9,951,932	-	9,951,932	-
Equities	2,503,758	619,637	1,737,742	146,379
Total financial assets	\$ 12,685,809	\$ 619,637	\$ 11,919,793	\$ 146,379
December 31, 2015				
Cash	\$ 45,815	\$ -	\$ 45,815	\$ -
Money market securities	177,339	-	177,339	-
Bonds	9,500,723	-	9,484,950	15,773
Equities	2,531,803	741,371	1,771,515	18,917
Total financial assets	\$ 12,255,680	\$ 741,371	\$ 11,479,619	\$ 34,690

Level 2 cash is valued using the end of day exchange rates. Level 2 money market securities are valued using the cost plus accrued interest. Level 2 bonds are valued using the quoted market price or dealer quotes for similar instruments exchanged in active markets. Level 2 equities (pooled funds) are valued using the net asset value.

The following table shows the movement of financial assets where fair value has been determined based upon significant unobservable inputs (Level 3). Level 3 equity investments consist of two investments in Canadian real estate pooled funds and an investment in a private fixed income fund. The period end fair values of the real estate pooled funds are provided by the investment managers and are based on the appraised values of the properties combined with any working capital. The private fixed income fund valuation is provided by the investment manager and is based on either the observed external or quoted price, if one exists, or if one does not exist, the discounted cash flows using the yields of externally priced comparable private or public fixed income funds.

Insurance Corporation of British Columbia

(\$ THOUSANDS)	Fair Value Measurements using Level 3 Inputs			
	Bonds		Equities	
March 31, 2017				
Balance, beginning of period	\$	15,773	\$	18,917
Additions		-		121,113
Principal repayments		(15,773)		-
Market value adjustment		-		6,349
Balance, end of period	\$	-	\$	146,379
December 31, 2015				
Balance, beginning of period	\$	1,638	\$	16,100
Additions		25,000		2,817
Principal repayments		(10,865)		-
Balance, end of period	\$	15,773	\$	18,917

The fair value of derivative instruments not designated as accounting hedges is as follows:

(\$ THOUSANDS)	March 31 2017		December 31 2015	
	Notional Amount	Fair Value Liabilities	Notional Amount	Fair Value Liabilities
Non-designated derivative instruments				
Forward contracts	\$ 412,396	\$ 10,499	\$ -	\$ -
Interest rate swap	91,850	203	-	-
Total derivative financial instrument liabilities	\$ 504,246	\$ 10,702	\$ -	\$ -

Beginning May 2016, the Corporation entered into contracts for derivative instruments not designated as accounting hedges, and a loss of \$32.8 million (2015 – no derivative instrument) was recognized in investment income for the period ended March 31, 2017 with respect to foreign currency forward contracts on the US bond portfolio. These economic hedges offset \$24.3 million in foreign exchange currency gains (2015 – no derivative instrument) recorded with respect to the US bond portfolio for the period ended March 31, 2017.

The non-designated derivative financial instruments are classified as Level 2 and are valued based on the difference between the forward rate at the contract initiation date and the prevailing forward rate on the reporting date.

b) Other financial assets

Other financial assets include accrued interest, premiums and other receivables, and reinsurance assets. The fair values of the majority of other financial assets approximate their carrying values due to their short-term nature. The non-current portion of these other financial assets is \$45.6 million (2015 – \$40.0 million).

c) Financial liabilities

Financial liabilities include cheques outstanding, accounts payable and accrued charges, bond repurchase agreements, investment-related and other liabilities, and amounts payable to the Province of B.C. All financial liabilities are carried at cost or amortized cost. Except for investment-related and other liabilities, the fair values of the remaining financial liabilities approximate their carrying values due to their short-term nature. The assumptions used in estimating the fair value of investment-related and other liabilities are discussed in note 8.

As at March 31, 2017, the general ledger bank balances representing cash inflows were \$140.5 million (2015 - \$4.8 million) and the general ledger bank balances representing cash outflows were \$219.0 million (2015 - \$69.6 million), netting to a cheques outstanding balance of \$78.5 million (2015 - \$64.8 million) on the consolidated statement of financial position.

8. Bond Repurchase Agreements, Investment-Related, and Other Liabilities

(\$ THOUSANDS)	March 31 2017	December 31 2015
	Carrying Value	Carrying Value
Bond repurchase agreements	\$ 1,180,060	\$ 1,153,733
Investment-related liabilities	143,637	15,482
Other liabilities	23,052	11,529
Total bond repurchase agreements, investment-related, and other liabilities	\$ 1,346,749	\$ 1,180,744
Non-current portion	\$ 144,617	\$ 23,842

Investment-related liabilities are comprised of mortgages payable of \$143.6 million (2015 – \$15.5 million) with repayment terms ranging from one to twelve years and interest rates ranging from 3.5% to 6.6% (2015 – 5.3% to 6.6%). Other liabilities consist of finance lease obligations, accrued interest payable, and unsettled trades. These liabilities are classified as Level 2 under the fair value hierarchy

Estimated principal repayments for investment-related and other liabilities are as follows:

(\$ THOUSANDS)	15 months ended March 31, 2017	12 months ended December 31, 2015
Up to 1 year	\$ 22,072	\$ 3,169
Greater than 1 year, up to 5 years	117,524	16,868
Greater than 5 years	27,093	6,974
	\$ 166,689	\$ 27,011

9. Management of Insurance and Financial Risk

As a provider of vehicle insurance products, effective risk management is fundamental in protecting earnings, cash flow, and ultimately the financial stability of the Corporation. The Corporation is exposed to various types of insurance and financial risks.

a) Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

The principal risk that the Corporation faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur when the frequency or severity of claims and benefits are greater than estimated. Insurance events have an element of randomness and the actual number and amount of claims and benefits will vary each year from the level established using statistical techniques.

Frequency and severity of claims

There are a number of factors that influence the frequency and severity of claims, some of which the Corporation has some control over. Frequency is the average number of claims per policy, calculated by dividing the total number of claims by the total number of policies. Severity is the average cost of a claim calculated by dividing the total cost of claims by the total number of claims. A number of strategies are used to control cost pressures created by these factors, including claims operational changes, road safety programs, programs to influence driver behaviour such as impaired driving and distracted driving programs, public awareness campaigns, auto crime reduction initiatives, and fraud detection and investigation.

Factors that impact both frequency and severity that the Corporation has little or no control over include: weather, demographics, court issued settlement awards, plaintiff legal fees, and economic changes, including vehicle parts/repair inflation and medical expense inflation that influence the cost of claims.

Sources of uncertainty in the estimation of the provision for unpaid claims

To manage the uncertainty associated with estimating the provision for unpaid claims, the Corporation's Chief Actuary employs standard actuarial methods. The Corporation's provision for unpaid claims estimate is determined in accordance with accepted actuarial practice in Canada and is based on reasonable assumptions and appropriate methods that are consistently applied (note 3a).

There is inherent uncertainty regarding the assumptions to estimate the amount and timing of future claims payments that make up the provision for unpaid claims. The Corporation is liable for all insured events that occurred during the term of the contract, even if the loss is reported after the end of the contract term. In addition, injury claims may take a long period of time to settle.

Injury claims include bodily injury, accident benefits, and death benefits, which account for approximately 65% (2015 – 67%) of total claims costs. The timing of injury claims can be extended due to delayed reporting, and the timing and amount of injury payments can exhibit considerable uncertainty because of the complex bodily injury claims environment, the subjective nature of pain and suffering damages, internal claims operational changes, the judicial environment, and settlement awards.

The provision for unpaid claims also includes having to estimate direct expenses to be incurred in settling claims net of the expected salvage and subrogation recoveries. The Corporation takes all reasonable steps to ensure that it has appropriate information regarding its individual claims. However, given the uncertainty during the early stages of a claim, it is likely that the final outcome will be different from the original estimate. The provision for unpaid claims includes a provision for reported claims not yet paid and an amount estimated for IBNR claims (note 2d).

The Corporation's provision for unpaid claims can be affected by the frequency and severity of claims, the discount rate, and actuarial methods and assumptions. The frequency and severity of claims are discussed above, while the discount rate and the actuarial methods and assumptions are discussed in note 3.

A one percentage point increase in the discount rate would have a favourable impact on the provision for unpaid claims, net income, and equity of \$252.8 million (2015 – \$214.1 million), and a one percentage point decrease in the discount rate would have an unfavourable impact on the provision for unpaid claims, net income, and equity of \$266.7 million (2015 – \$225.7 million). A one percentage point change in the cost of unpaid claims, with all other variables held constant, would result in an estimated change to the provision for unpaid claims of \$105.0 million (2015 – \$90.8 million). The changes in selected loss and count development factors and actuarial assumptions in 2016/17 had an estimated 0.9% unfavourable impact (2015 – 1.0% unfavourable) on the 2016/17 provision for unpaid claims. This impact includes an actuarial methodology change on the unallocated loss adjustment expense (ULAE) reserve (note 13).

Concentration of insurance risk

The Corporation has a diverse customer base as the sole provider of Basic insurance to all drivers in British Columbia. The Corporation operates in one jurisdiction and provides vehicle insurance only, so there is a concentration of insurance risk with respect to geography, jurisdiction, demographics, and product type.

The impact of the concentration of insurance risk is quantified through CAT (catastrophe) modeling that the Corporation's reinsurance broker updates annually. This testing allows the Corporation to assess and manage these risks effectively. The concentration of insurance risk is also managed through a CAT reinsurance treaty, a casualty reinsurance treaty, and road safety programs such as road improvement strategies, the graduated licensing program, and the distracted driving campaign because as the sole provider of Basic insurance, the Corporation invests in and benefits the most from these programs.

Premium pricing risk

The Corporation is the sole provider of Basic insurance and is not subject to competition risk for its Basic insurance product. However, the Basic insurance rate level is sensitive to investment market conditions and claims experience, which can result in premiums being insufficient to cover costs. The Corporation is subject to regulations over its Basic insurance and applies to BCUC for approval to change its Basic insurance rate. The Corporation is required to make Basic insurance rate applications on an annual basis, and BCUC is required

to set rates according to accepted actuarial practice. These aspects of regulation mitigate the underwriting risk associated with pricing for the Basic insurance product (note 22).

The Province of B.C. directs income transfers from Optional insurance to Basic insurance in order to keep Basic rates as low as possible. Also, the Province of B.C. may direct capital transfers from Optional insurance to bolster Basic insurance capital.

Regulation establishes the rate smoothing framework that allows for the use of capital to remove adverse rate volatility. As a result of the framework, the Corporation's ability to set rates to cover costs can be impacted by BCUC setting rates below cost for a period of time. An independent review has been commissioned by the Corporation's Board, tasked with examining all key cost drivers impacting the affordability and sustainability of Basic insurance rates, and potential mitigation strategies. Subject to the changes arising from the independent review and the other initiatives, the Corporation's capital may continue to face added risk (note 22).

The Corporation's Optional insurance products compete with other insurers and are subject to underwriting risk and competition risk.

b) Financial risk

Concentration of financial risk

The Corporation establishes investment portfolio level targets and limits with the objective of ensuring that portfolios are diversified across asset classes and individual investment risks. The Corporation monitors actual investment positions and risk exposures for concentration risk.

As at March 31, 2017, the equity portfolio was 27.9% (2015 – 31.2%) invested in the financial sector, 15.0% (2015 – 13.7%) in the energy sector, and 11.3% (2015 – 10.4%) in the industrial sector. The bond portfolio was 48.7% (2015 – 54.5%) invested in the government sector and 23.1% (2015 – 20.3%) invested in the financial sector. See credit risk for a discussion of the government bonds.

Concentration of geographical risk

Geographical concentration risks are a result of the Corporation having investments from around the world. These risks include varying general economic conditions, political conditions, and other factors that could affect the fair value and liquidity of the investments. The Corporation has contracted external investment managers to manage its global investments in diversified global funds. As at March 31, 2017, the investment portfolio was 89.2% (2015 – 89.0%) invested in Canada, 8.78% (2015 – 8.78%) invested in the United States, and 2.0% (2015 – 2.2%) was invested elsewhere around the world.

Price risk

General economic conditions, political conditions, and other factors affect the equity markets, thereby also affecting the fair value of the securities and the pooled funds held by the Corporation. Fluctuations in the value of these securities impact the recognition of unrealized gains and losses on equity securities and on the units of funds held. As at March

31, 2017, the impact of a 10 per cent change in prices, with all other variables held constant, would result in an estimated corresponding change to OCI of approximately \$250.3 million (2015 – \$253.2 million).

The Corporation manages a widely diversified portfolio, diversified geographically, by sector, and by company, and has policies in place to limit and monitor total equity exposure and individual issuer exposure.

Interest rate risk

When interest rates increase or decrease, the market value of fixed income securities will decrease or increase respectively with a larger market value impact on instruments with a long duration compared to instruments with a short duration. Fluctuations in interest rates have a direct impact on the market valuation of the Corporation’s fixed income portfolio. A natural hedge exists between the Corporation’s fixed income portfolio and the provision for unpaid claims, as the Corporation’s investment yields are used to derive the discount rate for the provision for unpaid claims (note 9a).

The Corporation has policies in place to limit and monitor its exposure to interest rate risk to allow for duration matching of claim liabilities to bond assets.

The carrying values reported in the consolidated statement of financial position for cash and cash equivalents, premiums and other receivables, and accounts payable and accrued charges approximate their fair values and are not significantly impacted by fluctuations in interest rates.

In 2016/17, the Corporation did not use material (2015 – nil) derivative financial instruments to hedge interest rate risk on its investment portfolio.

	March 31 2017		December 31 2015	
	Average Yield (%)	Duration (Years)	Average Yield (%)	Duration (Years)
Bonds				
Canadian				
Federal	1.1	3.2	0.9	2.5
Provincial	1.4	2.9	1.7	2.9
Municipal	1.6	2.5	1.8	3.0
Corporate	1.9	2.6	2.1	2.2
United States				
High yield corporate	5.9	4.1	8.2	4.5
Total bonds	1.9	2.9	2.1	2.6
Mortgages and other loan	3.5	2.6	3.7	2.7
Total bonds, mortgages and other loan	2.1	2.9	2.3	2.6

As at March 31, 2017, a 100 basis point change in interest rates would result in a change of approximately \$337.9 million (2015 – \$294.8 million) in fair value of the Corporation’s fixed

income portfolio and a corresponding impact of approximately \$337.9 million (2015 – \$294.8 million) to OCI. Interest rate changes would also result in an inverse change to the provision for unpaid claims and the corresponding claims costs (note 9a).

Credit risk

Credit risk is the potential for financial loss to the Corporation if the counterparty in a transaction fails to meet its obligations. Financial instruments that potentially give rise to concentrations of credit risk include cash and cash equivalents, fixed income securities, accounts receivable, reinsurance receivables and recoverables, and structured settlements (note 21a). The total credit risk exposure is \$10.24 billion (2015 – \$9.05 billion).

Fixed income securities

Fixed income securities are comprised of Canadian investment grade bonds, US high yield corporate bonds, and mortgages. The Corporation mitigates its overall exposure to credit risk in its fixed income securities by holding the majority of its fixed income portfolio in investment grade bonds, and by limiting its exposure to US high yield bonds to a maximum of 6% (2015 – 6%) of total investment assets and mortgages to a maximum of 14% (2015 – 14%) of total investment assets. The Corporation further limits the risk in its high yield corporate bonds by holding bonds that are rated B or better for at least 95% of the high yield bond portfolio. All high yield bonds are analyzed by external investment professionals who manage the portfolio for the Corporation. Credit risk in mortgages is mitigated by the security of the underlying mortgaged property. Mortgages are subject to an independent review annually. The risk is also addressed through a stringent underwriting process that incorporates an internal credit scoring mechanism.

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings, where available, or to historical information about counterparty default rates.

The maximum credit risk exposure for fixed income securities pertain to all bond investments and to mortgage investments; however the Corporation considers Canadian government bonds to be risk-free. Therefore, the total carrying amount is \$8.67 billion (2015 – \$7.64 billion). There is minimal credit risk exposure to cash.

The counterparty risk associated with repurchase agreements for 2016/17 and 2015 is not material.

Insurance Corporation of British Columbia

The Corporation's money market securities and bonds by credit quality according to Standard and Poor's are as follows:

(\$ THOUSANDS)	March 31 2017	December 31 2015
Money market securities		
AAA	\$ 202,991	\$ 177,339
Bonds		
AAA	\$ 3,881,943	\$ 4,448,306
AA	1,201,331	923,511
A	2,943,512	2,566,890
BBB	1,175,212	817,586
Below BBB	749,934	744,430
	\$ 9,951,932	\$ 9,500,723

Premiums and other receivables

The Corporation has a diverse customer base as it provides Basic insurance to all drivers in British Columbia. While there is no significant individual concentration of credit risk, the Corporation's premiums and other receivables are comprised of customers with varying financial conditions.

The credit risk for premiums receivables is mitigated as a customer's policy may be cancelled if the customer is in default of a payment. The maximum credit risk for all other receivables equals their carrying amount. As at March 31, 2017, the Corporation considered \$64.1 million (2015 – \$60.2 million) of its premiums and other receivables to be uncollectible and has provided for them. The allowance was determined by applying a percentage derived from four to five years of collection experience by receivable type to the total of current and prior periods' gross billings.

Insurance Corporation of British Columbia

The following table outlines the aging of premiums and other receivables as at March 31, 2017 and at December 31, 2015:

(\$ THOUSANDS)					
	Current	Past Due 1 – 30 days	Past Due 31 – 60 days	Over 60 days	Total
March 31, 2017					
Premiums and other receivables	\$ 1,427,302	\$ 4,094	\$ 3,401	\$ 85,003	\$ 1,519,800
Provision	(1,785)	(1,490)	(1,441)	(59,408)	(64,124)
Total premiums and other receivables	<u>\$ 1,425,517</u>	<u>\$ 2,604</u>	<u>\$ 1,960</u>	<u>\$ 25,595</u>	<u>\$ 1,455,676</u>
December 31, 2015					
Premiums and other receivables	\$ 1,277,446	\$ 2,635	\$ 2,389	\$ 79,353	\$ 1,361,823
Provision	(1,304)	(1,365)	(1,370)	(56,136)	(60,175)
Total premiums and other receivables	<u>\$ 1,276,142</u>	<u>\$ 1,270</u>	<u>\$ 1,019</u>	<u>\$ 23,217</u>	<u>\$ 1,301,648</u>

The movements in the provision for premiums and other receivables are as follows:

(\$ THOUSANDS)	March 31 2017	December 31 2015
Balance, beginning of period	\$ (60,175)	\$ (64,506)
Charges for the period	(26,243)	(19,982)
Recoveries	6,209	5,186
Amounts written off	16,085	19,127
Balance, end of period	<u>\$ (64,124)</u>	<u>\$ (60,175)</u>

Reinsurance assets

Failure of reinsurers to honour their obligations could result in losses to the Corporation. The maximum credit risk exposure equals the carrying amount of \$18.1 million (2015 – \$10.5 million). The Corporation has policies which require reinsurers to have a minimum credit rating of A-. No single reinsurer represents more than 15% of the total reinsurers' share of the provision for unpaid claims and adjusting expenses in a contract year. Both these items mitigate the Corporation's exposure to credit risk. No amount owing from the reinsurers has been considered impaired as at March 31, 2017 (2015 - nil).

(\$ THOUSANDS)	March 31 2017	December 31 2015
Reinsurance recoverable (note 13)	\$ 16,977	\$ 10,407
Reinsurance receivable	1,093	40
Reinsurance assets	<u>\$ 18,070</u>	<u>\$ 10,447</u>

Liquidity risk

A significant business risk of the insurance industry is the uncertain ability to match the cash inflows from premiums and the investment portfolio with the cash requirements of the policy liabilities and operating expenses. The timing of most policy liability payments is not known, and may take considerable time to determine precisely, and may be paid in partial payments.

Liquidity risk is the risk that the Corporation is unable to meet its financial obligations as they fall due. Cash resources are managed on a daily basis based on anticipated cash flows. The majority of financial liabilities, except for the provision for unpaid claims, pension and post-retirement benefits, and investment-related and other liabilities, are short-term in nature and due within one year. The Corporation generally maintains positive overall cash flows through cash generated from operations as well as cash generated from its investing activities. Where overall cash flows are negative, the Corporation maintains sufficient liquid assets (money market) to cover any shortfall from operations. In addition, the Corporation has a netting arrangement with its banks that permits positive bank balances to be offset against negative bank balances.

Liquidity risk is primarily controlled by holding government bonds and other highly liquid investments which can be readily sold. In addition, the Corporation takes into account the overall historical liability settlement pattern and the historical cash in-flows as a basis to broadly define diversification and duration characteristics of the investment portfolio.

Insurance Corporation of British Columbia

The following table summarizes the maturity profile of the Corporation's fixed income investments by contractual maturity or expected cash flow dates:

(\$ THOUSANDS)				
	Within One Year	One Year to Five Years	After Five Years	Total

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Corporation is exposed to direct foreign exchange risk on its US fixed income portfolios. However, this is partially mitigated through the use of economic hedges using foreign exchange forward contracts (note 7). A 10% change in the US exchange rate as at March 31, 2017 would change the fair value of these investments and result in a change to net income of approximately \$39.1 million (2015 – \$76.2 million) related to the unhedged monetary AFS financial assets.

The Corporation does not have any direct foreign exchange risk on its global equity portfolio in the current period (2015 – nil). However, the Corporation is exposed to indirect foreign exchange risk.

Insurance Corporation of British Columbia

The Corporation has policies in place to limit and monitor its exposure to currency risks.

10. Investment Income

(\$ THOUSANDS)	Classification	15 months ended March 31, 2017	12 months ended December 31, 2015
Interest

Net book value, end of period	\$ 30,734	\$ 27,047	\$ 40,749	\$ 4,903	\$ 103,433

The balances in property and equipment include \$14.0 million (2015 – \$13.9 million) in assets under development.

Property and equipment includes a net disposal of \$1.7 million (2015 – \$0.2 million) related to the Transformation Program (note 20).

12. Intangible Assets

(\$ THOUSANDS)	March 31 2017	December 31 2015
Cost		
Balance, beginning of period	\$ 356,675	\$ 280,233
Additions	57,991	76,777
Disposals	(1,251)	(335)
Balance, end of period	413,415	356,675
Accumulated amortization		
Balance, beginning of period	77,120	57,931
Disposals	(561)	(335)
Amortization charge for the period	34,348	19,524
Balance, end of period	110,907	77,120
Net book value, end of period	\$ 302,508	\$ 279,555

The Corporation's intangible assets consist of externally purchased software and any directly attributable costs required to bring the software to a condition where it is available for use.

The balance in intangible assets include \$4.1 million (2015 – \$156.6 million) in assets under development.

The additions in intangible assets include \$31.7 million (2015 – \$52.7 million) related to the Transformation Program (note 20). There were no indefinite life intangible assets as at March 31, 2017 and December 31, 2015.

13. Provision for Unpaid Claims

The movements in the provision for unpaid claims and reinsurance recoveries and their impact on claims incurred for the period are as follows:

(\$ THOUSANDS)	March 31 2017			December 31 2015		
	Gross	Reinsurance Recoverable	Net	Gross	Reinsurance Recoverable	Net
Notified claims	\$ 5,343,964	\$ (10,407)	\$ 5,333,557	\$ 4,661,581	\$ (8,655)	\$ 4,652,926
Incurred but not reported	3,749,176	-	3,749,176	3,543,851	-	3,543,851
Balance, beginning of period	9,093,140	(10,407)	9,082,733	8,205,432	(8,655)	8,196,777
Change in liabilities (assets):

Recoveries received on prior periods' claims	78,648	3,694	82,342	65,887	341	66,228
	(2,789,736)	3,694	(2,786,042)	(2,023,437)	341	(2,023,096)
Total net payments	(4,551,790)	3,694	(4,548,096)	(3,156,632)	341	(3,156,291)
Balance, end of period	\$ 10,517,971	\$ (16,977)	\$ 10,500,994	\$ 9,093,140	\$ (10,407)	\$ 9,082,733
Notified claims	\$ 6,874,682	\$ (16,977)	\$ 6,857,705	\$ 5,343,964	\$ (10,407)	\$ 5,333,557
Incurred but not reported	3,643,289	-	3,643,289	3,749,176	-	3,749,176
Balance, end of period	\$ 10,517,971	\$ (16,977)	\$ 10,500,994	\$ 9,093,140	\$ (10,407)	\$ 9,082,733

The Corporation discounts its provision for unpaid claims using a discount rate of 2.8% (2015 – 3.0%). The Corporation determines the discount rate based upon the expected return on its investment portfolio, the expected asset default risk of its investment portfolio, and uses assumptions for interest rates relating to reinvestment of maturing investments. As a result of the decrease in the discount rate, there was an unfavourable adjustment to both current and prior periods' provision of \$54.2 million (2015 – \$22.5 million unfavourable).

During 2016/17, the Corporation refined its ULAE reserve methodology for the additional cost of increased injury claims staffing. The impact of this change to the 2016/17 fiscal loss year net provision for unpaid claims was unfavourable by \$73.9 million. The additional injury staff, once

Insurance Corporation of British Columbia

trained are expected to reduce the number of bodily injury claims that are pending, and manage pressures on bodily injury incurred severity.

The following table shows the effect of discounting and PfADs on the provision for unpaid claims:

(\$ THOUSANDS)	Undiscounted	Effect of Present Value	PFADs	Discounted
March 31, 2017				
Provision for unpaid claims, net	\$ 10,054,790	\$ (678,640)	\$ 1,124,844	\$ 10,500,994
Reinsurance recoverable	16,073	(1,284)	2,188	16,977

Provision for unpaid claims, gross	<u>\$ 8,764,232</u>	<u>\$ (624,726)</u>	<u>\$ 953,634</u>	<u>\$ 9,093,140</u>

Claims development table

A review of the historical development of the Corporation's insurance estimates provides a measure of the Corporation's ability to estimate the ultimate value of claims. The top half of the table illustrates how the Corporation's estimate of total undiscounted claims costs for each loss year has changed at successive year-ends. The bottom half of the table reconciles the cumulative claims to the amount appearing in the consolidated statement of financial position.

As a result of the change in period end, there are two claims development tables: one as at March 31, 2017 and one as at December 31, 2015. The Corporation changed to a March 31 period end in the current period and therefore there is no historical data in the table as at March 31, 2017. The history for all prior periods ending December 31 is shown in the table as at December 31, 2015.

Insurance Corporation of British Columbia

Claims development table as at March 31, 2017:

(\$ THOUSANDS)	Insurance Claims - Gross of Reinsurance										
Fiscal Loss Year*	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	Total
Estimate of undiscounted ultimate claims costs:											
- At end of fiscal loss year											\$ 4,372,966
- One year later									\$ 4,037,775		
- Two years later								\$ 3,695,574			
- Three years later							\$ 3,313,949				
- Four years later						\$ 3,042,291					
- Five years later					\$ 2,837,869						
- Six years later				\$ 2,863,073							
- Seven years later			\$ 2,677,669								
- Eight years later		\$ 2,710,932									
- Nine years later	\$ 2,591,256										
Current estimate of cumulative claims	2,591,256	2,710,932	2,677,669	2,863,073	2,837,869	3,042,291	3,313,949	3,695,574	4,037,775	4,372,966	32,143,354
Cumulative payments to date	(2,559,428)	(2,642,522)	(2,586,952)	(2,675,283)	(2,523,493)	(2,392,418)	(2,162,628)	(1,938,918)	(1,797,593)	(1,348,594)	(22,627,829)
Undiscounted provision for unpaid claims	\$ 31,828	\$ 68,410	\$ 90,717	\$ 187,790	\$ 314,376	\$ 649,873	\$ 1,151,321	\$ 1,756,656	\$ 2,240,182	\$ 3,024,372	\$ 9,515,525
Undiscounted provision for unpaid claims in respect of 2007 and prior years											\$ 139,237
Undiscounted unallocated loss adjustment expense reserve											416,101
Total undiscounted provision for unpaid claims											\$ 10,070,863
Discounting adjustment											447,108
Total discounted provision for unpaid claims (gross)											\$ 10,517,971

*Fiscal Loss Year refers to the 12 month period ended March 31

The cumulative payments for the 15 month period ended March 31, 2017 are \$1.76 billion, which consists of the cumulative payments for the 12 month period ended March 31, 2017 (in the above table) and the cumulative payments for the three month period from January 1, 2016 to March 31, 2016 of \$0.41 billion.

The table above reflects the total discounted provision for unpaid claims of \$10.52 billion before the amount for reinsurance recoverable. The total discounted provision for unpaid claims after the amount for reinsurance recoverable of \$0.02 billion would be \$10.5 billion.

Insurance Corporation of British Columbia

Claims development table as at December 31, 2015:

Current estimate of cumulative claims	2,502,510	2,613,146	2,712,010	2,639,312	2,778,347	2,841,115	3,024,045	3,200,324	3,518,858	3,765,040	29,594,707
Cumulative payments to date	(2,471,704)	(2,572,228)	(2,608,751)	(2,494,717)	(2,456,903)	(2,224,008)	(1,981,022)	(1,717,805)	(1,524,464)	(1,133,195)	(21,184,797)
Undiscounted provision for unpaid claims	\$ 30,806	\$ 40,918	\$ 103,259	\$ 144,595	\$ 321,444	\$ 617,107	\$ 1,043,023	\$ 1,482,519	\$ 1,994,394	\$ 2,631,845	\$ 8,409,910
Undiscounted provision for unpaid claims in respect of 2005 and prior years											125,350
Undiscounted unallocated loss adjustment expense reserve											228,972
Total undiscounted provision for unpaid claims											\$ 8,764,232
Discounting adjustment											328,908
Total discounted provision for unpaid claims (gross)											\$ 9,093,140

The cumulative payments for the 12 month period ended December 31, 2015 are \$1.13 billion. The table above reflects the total discounted provision for unpaid claims as at December 31, 2015 of \$9.09 billion before the amount for reinsurance recoverable. The total discounted provision for unpaid claims after the amount for reinsurance recoverable of \$0.01 billion would be \$9.08 billion.

The expected maturity of the provision for unpaid claims is analyzed below (undiscounted and gross of reinsurance):

(\$ THOUSANDS)							
	Less than One Year	One to Two Years	Two to Three Years	Three to Four Years	Four to Five Years	Over Five Years	Total
March 31, 2017	\$ 2,764,809	\$ 2,324,378	\$ 1,568,492	\$ 1,292,585	\$ 890,677	\$ 1,229,922	\$ 10,070,863
December 31, 2015	\$ 2,349,180	\$ 1,895,885	\$ 1,616,192	\$ 1,227,851	\$ 730,170	\$ 944,954	\$ 8,764,232

The non-current portion of the undiscounted provision for unpaid claims is \$7.31 billion (2015 - \$6.42 billion).

The weighted-average term to settlement of the discounted provision for unpaid claims as at March 31, 2017 is 2.5 years (2015 - 2.5 years).

14. Unearned Premiums

All unearned premiums are earned within 12 months of the reporting date. The movements in unearned premiums net of reinsurance and the impact on premiums earned for the period are as follows:

(\$ THOUSANDS)	March 31 2017	December 31 2015
Balance, beginning of period	\$ 2,210,364	\$ 2,021,458
Premiums written during the period	6,253,099	4,636,837
Premiums earned during the period	(6,050,642)	(4,447,931)
Premium adjustment	1,682	-
Balance, end of period	\$ 2,414,503	\$ 2,210,364

15. Reinsurance

The Corporation maintains casualty and catastrophe reinsurance to protect against significant losses.

The Corporation entered into twelve months casualty and catastrophe reinsurance contracts beginning January 1, 2017, 2016 and 2015 as follows:

- a) For both 2016 and 2017 calendar years, for catastrophic occurrences, portions of losses up to \$225.0 million (2015 – \$225.0 million) in excess of \$25.0 million (2015 – \$25.0 million); and
- b) For both 2016 and 2017 calendar years, for individual casualty loss occurrences, portions of losses up to \$45.0 million (2015 – \$45.0 million) in excess of \$5.0 million (2015 – \$5.0 million).

These reinsurance arrangements do not discharge the Corporation's obligation as primary insurer. The Corporation evaluates the financial condition of its reinsurers to minimize the exposure to significant loss from reinsurer insolvency.

16. Pension and Post-Retirement Benefits

Plan information

The Corporation sponsors a defined benefit registered pension plan for its current and former management and confidential employees (the Management and Confidential Plan). Subject to the terms of the plan, the Management and Confidential Plan provides benefits to members based on their length of service and eligible earnings in the best five years of plan membership.

Employees are required to contribute to the Management and Confidential Plan. In addition, it sponsors two supplemental pension plans for certain employees. The Corporation is the legal administrator of the Management and Confidential Plan and the two supplemental pension plans. Subject to the terms of the plans, pensions are indexed in line with increases in the Consumer Price Index (CPI).

The Corporation also contributes to two other defined benefit pension plans for which it is not the sole sponsor. Current and former employees of the Corporation who are or were members of the Canadian Office & Professional Employees Union (COPE) Local 378 are members of the COPE 378/Insurance Corporation of British Columbia Pension Plan (COPE Plan). Half of the Trustees of the COPE Plan are appointed by the Corporation and the other half by COPE Local 378. The Board of Trustees of the COPE Plan is the legal plan administrator. The COPE Plan provides benefits to members based on their length of service and eligible earnings in the best five years of plan membership. Subject to the terms of the plan, pensions are indexed in line with increases in the CPI. The Corporation's former Motor Vehicle Branch employees participate in the BC Public Service Pension Plan. The Corporation has no fiduciary responsibility for, or role in the governance of, the COPE Plan or the BC Public Service Pension Plan.

The Management and Confidential Plan, COPE Plan, and the BC Public Service Pension Plan are subject to the statutory requirements (including minimum funding requirements) of the British Columbia *Pension Benefits Standards Act (PBSA)* and the *Income Tax Act (Canada)*. Each plan's pace of funding is set out in their respective funding policies.

The Corporation pays Medical Services Plan premiums, life insurance premiums, extended healthcare, and dental costs as post-retirement benefits for its qualifying retirees. The benefits are not prefunded. Benefit entitlements differ for management and confidential and bargaining unit employees, as stated within the terms of the plans.

The Corporation measures its defined benefit obligations and the fair value of plan assets for accounting purposes each period as at the end of the Corporation's fiscal period. Defined benefit obligations are extrapolated from the most recent actuarial valuation date for each of the plans. The Management and Confidential Plan and the post-retirement benefits actuarial valuations are as of December 31, 2015 and the COPE Plan is as of December 31, 2014. Updated actuarial valuations for each plan will be as of no later than three years from their most recent actuarial valuation date.

On its consolidated statement of financial position, the Corporation derecognizes its portion of any surplus assets held by the COPE Plan because it cannot realize a future economic benefit in respect of those assets.

An additional liability may be recognized in respect of future surplus created by minimum funding requirements. For this purpose, these minimum funding requirements include going concern current service costs and minimum payments toward going concern unfunded liabilities. The Corporation has determined that no additional liability is required to be recognized in respect of solvency funding payments because the British Columbia *PBSA* permits the Corporation to secure these payments with a letter of credit in lieu of cash solvency payments or deposits in the Plan's solvency reserve account.

The weighted-average durations of the pension plans and post-retirement benefits are shown below, along with the approximate proportions of the defined benefit obligation by membership category:

	Pension Plans		Post-Retirement Benefits	
	March 31 2017	December 31 2015	March 31 2017	December 31 2015
Weighted-average duration	18 years	20 years	20 years	17 years
Proportion of obligation in respect of:				
- Active members	61.9%	65.5%	64.1%	67.7%
- Deferred members	5.0%	4.3%	0.0%	0.0%
- Retired members	33.1%	30.2%	35.9%	32.3%

Since pensions are adjusted to changes in the CPI, the pension plans are exposed to changes in levels and volatility in Canada's inflation rate. In addition, the plans' obligations are exposed to interest rate risk and changes in the life expectancy for pensioners. As the plan assets include significant investments in quoted equity shares, the Corporation is also exposed to equity market risk.

Contributions to all pension and post-retirement benefit plans

Total contributions for employee future benefits for 2016/17, consisting of cash contributed by the Corporation to all of the funded pension plans and in respect of benefits paid from its unfunded pension and post-retirement benefits, were \$131.6 million (2015 – \$35.9 million). Estimated employer contributions for the period ending March 31, 2018 are \$59.7 million (2015 – \$40.6 million). The estimate is based on the plans' most recent actuarial funding valuations. This includes ongoing minimum payments for the solvency deficiency funding as permitted by the B.C. *PBSA*.

As permitted by legislation, the Corporation secured certain solvency funding requirements using an unsecured letter of credit. As at March 31, 2017, the Corporation no longer had a letter of credit secured for the Management and Confidential Plan (2015 – one letter of credit for \$56.2 million). In lieu of the letter of credit, the Corporation made payments totalling \$83.1 million to cover the solvency funding requirements (2015 – nil). The payments were made into a Solvency Reserve Account (SRA), which is a separate account that is established to hold solvency deficiency payments made under a defined benefit component of a pension plan. The only funds that may be deposited to the SRA are payments made in respect of a solvency deficiency.

Financial information

These consolidated financial statements include the asset and liabilities of all plans sponsored by the Corporation. The amounts recorded on the statement of financial position are as follows:

(\$ THOUSANDS)	Pension Plans		Post-Retirement Benefits		Total	
	March 31 2017	December 31 2015	March 31 2017	December 31 2015	March 31 2017	December 31 2015
Assets						
Accrued pension benefits	\$ 37,302	\$ -	\$ -	\$ -	\$ 37,302	\$ -
Liabilities						
Pension and post-retirement benefits	(60,945)	(141,238)	(349,451)	(337,796)	(410,396)	(479,034)
Net total liability	\$ (23,643)	\$ (141,238)	\$ (349,451)	\$ (337,796)	\$ (373,094)	\$ (479,034)

One of the pension plans is in a net asset position and, as a result, that plan is required to be reported as an asset on the consolidated statement of financial position. The net total liability for all of the Corporation's pension plans and post-retirement benefits as at March 31, 2017 is \$373.1 million (2015 – \$479.0 million), which is reflected in the consolidated statement of financial position as a \$37.3 million asset and a \$410.4 million liability as illustrated in the table above.

Insurance Corporation of British Columbia

Information regarding the pension plans and post-retirement benefits is as follows:

(\$ THOUSANDS)	Pension Plans		Post-Retirement Benefits	
	March 31 2017	December 31 2015	March 31 2017	December 31 2015

Interest on surplus derecognition	-	(446)	-	-
Remeasurements on surplus derecognition	-	11,608	-	-
Impact, end of period	\$ -	\$ -	\$ -	\$ -

The net total expense for the pension plans and post-retirement benefits is \$103.7 million (2015 – \$76.2 million). In addition, the Corporation contributed \$0.7 million in 2016/17 (2015 – \$0.7 million) to the BC Public Service Pension Plan.

Assets

The pension plans' assets consist of:

	Percentage of Plan Assets	
	March 31 2017	December 31 2015
Cash and accrued interest	0.2%	0.2%
Equities		
Canadian	22.8%	27.9%
Foreign	34.9%	29.3%
Fixed income		
Government	26.5%	29.5%
Corporate	8.9%	11.8%
Mortgages	1.0%	1.3%
Hedge fund	5.7%	-
	100.0%	100.0%

All equity securities and bonds have quoted prices in active markets. All bonds are rated from BBB to AAA, based on rating agency ratings.

Pension plan assets generated a return of 9.5% for the period ended March 31, 2017 (2015 – 5.6%).

For the Management and Confidential Plan, the administrator compares the investment performance of the fund against the median investment performance of a peer group of comparable pension funds at least quarterly. In addition, there are monthly and quarterly asset allocation reviews performed to ensure compliance with investment policies. For the COPE Plan, the long-term objective is to obtain an investment return that will exceed the investment return assumption used in the actuarial valuation and to provide positive real growth. The Trustees review the fund managers' performance on a quarterly basis.

As at March 31, 2017 and December 31, 2015, the Corporation's pension plans did not hold any of the Corporation's securities or assets nor were any of the plans' assets used by the Corporation during these periods.

Assumptions

The significant actuarial assumptions adopted in measuring the Corporation's defined benefit obligation are as follows (weighted-average assumptions):

	Pension Plans		Post-Retirement Benefits	
	March 31 2017	December 31 2015	March 31 2017	December 31 2015
Discount rate	3.70%	4.00%	3.70%	4.00%
Rate of compensation increase	2.63%	2.85%	n/a	n/a
Pension inflation rate	1.75%	2.00%	n/a	n/a

Mortality assumptions are significant in measuring the obligations under the defined benefit plans. Future longevity improvements have been considered and included where appropriate. The following table summarizes the life expectancy for members, in years, based on the mortality assumption used:

March 31, 2017				December 31, 2015			
Life expectancy at 65 for a member currently				Life expectancy at 65 for a member currently			
Age 65		Age 45		Age 65		Age 45	
Male	Female	Male	Female	Male	Female	Male	Female
21.6	24.4	22.7	25.3	21.5	24.3	22.6	25.2

As at March 31, 2017, the Medical Services Plan trend rate is assumed to be four per cent per annum. As at December 31, 2015, the Medical Services Plan trend rate was assumed to be six per cent per annum for the first four years, decreasing to three per cent per annum thereafter.

As at March 31, 2017, the extended healthcare trend rate is assumed to be seven and a fifth per cent per annum for the first year, decreasing linearly over nine years to four and a half per cent per annum thereafter. As at December 31, 2015, the extended healthcare trend rate was assumed to be six and a half per cent per annum for the first year, decreasing linearly over four years to five per cent per annum thereafter.

The Plans' sensitivity to significant assumptions is shown below:

(\$ THOUSANDS)	Pension Plans		Post-Retirement Benefits	
	March 31 2017	December 31 2015	March 31 2017	December 31 2015
Estimated increase in defined benefit obligation - end of period due to:				
1% decrease in discount rate	\$ 392,818	\$ 397,036	\$ 69,956	\$ 58,173
1% increase in salary increase rate	\$ 86,875	\$ 89,469	n/a	n/a
1% increase in pension inflation rate	\$ 313,966	\$ 298,799	n/a	n/a
1% increase in healthcare trend rate	n/a	n/a	\$ 8,787	\$ 9,199
1% increase in medical services premium increase rate	n/a	n/a	\$ 36,506	\$ 29,226
1 year increase in life expectancy	\$ 63,592	\$ 55,753	\$ 6,789	\$ 6,334

The sensitivity to the significant assumptions has been determined assuming all other assumptions remain unchanged. If multiple assumptions were to change at the same time, there may be correlations between assumptions that could result in different impacts than simply adding the individual sensitivities above.

17. Operating Costs by Nature

(\$ THOUSANDS)	15 months ended March 31 2017	12 months ended December 31 2015
Operating costs – by nature		
Premium taxes and commission expense	\$ 763,261	\$ 564,061
Premium deficiency adjustments	92,952	66,899
Employee benefit expense:		
Compensation and other employee benefits	465,464	346,340
Pension and post-retirement benefits (note 16 and 23)	104,418	76,874
Professional and other services	53,303	40,457
Road improvements and other traffic safety programs	41,610	32,981
Building operating expenses	36,038	27,493
Merchant and bank fees	47,603	37,180
Office supplies and postage	26,103	20,430
Computer costs	36,862	25,776
Depreciation and amortization (note 11 and 12)	54,718	37,414
Other	27,398	20,081
	\$ 1,749,730	\$ 1,295,986
Operating costs – consolidated statement of comprehensive income		
Premium taxes and commissions – insurance	\$ 818,696	\$ 600,625
Claims services	383,789	271,068
Operating costs – insurance	322,799	244,371
Operating costs – non-insurance	125,986	99,407
Road safety and loss management services	60,943	50,180
Commissions – non-insurance	37,517	30,335
	\$ 1,749,730	\$ 1,295,986

18. Deferred Premium Acquisition Costs and Prepays and Premium Deficiency

As stated in note 3e, the DPAC as at March 31, 2017 is calculated at a combined Corporate level as opposed to separate calculations for the Optional and Basic lines of business.

The Corporate DPAC as at March 31, 2017 is as follows:

(\$ THOUSANDS)	March 31 2017
Deferred premium acquisition costs, beginning of period	\$ 86,776
Acquisition costs related to future periods	16,481
Amortization of prior period acquisition costs	(86,776)
Deferred premium acquisition costs, end of period	<u>\$ 16,481</u>
Deferred premium acquisition costs	\$ 16,481
Prepaid expenses	<u>20,021</u>
Deferred premium acquisition costs and prepaids	<u>\$ 36,502</u>

As at December 31, 2015, the DPAC for the Optional and Basic lines of business were calculated separately. The DPAC for the Optional line of business as at December 31, 2015 was as follows:

(\$ THOUSANDS)	December 31 2015
Deferred premium acquisition costs, beginning of period	\$ 151,996
Acquisition costs related to future periods	162,598
Amortization of prior period acquisition costs	(151,996)
Deferred premium acquisition costs, end of period	<u>\$ 162,598</u>
Deferred premium acquisition costs	\$ 162,598
Prepaid expenses	<u>20,182</u>
Deferred premium acquisition costs and prepaids	<u>\$ 182,780</u>

Insurance Corporation of British Columbia

The premium deficiency for the Basic line of business as at December 31, 2015 was as follows:

(\$ THOUSANDS)	December 31 2015
Premium deficiency, beginning of period	\$ (15,794)
Acquisition costs related to future periods	95,932
Amortization of prior period deficiency	15,794
Actuarial valuation adjustment	(171,754)
Premium deficiency, end of period	<u>\$ (75,822)</u>

The commission and premium tax expenses reflected in the consolidated statement of comprehensive loss are as follows:

(\$ THOUSANDS)	Commissions	Premium Taxes	Total
March 31, 2017			
Amount payable	\$ 509,926	\$ 275,992	\$ 785,918
Amortization of prior period deferred premium acquisition costs	93,165	(6,389)	86,776
Deferred premium acquisition costs	(38,574)	22,093	(16,481)
Premium taxes, commission expense and deferred premium acquisition costs	<u>\$ 564,517</u>	<u>\$ 291,696</u>	<u>\$ 856,213</u>
Represented as:			
Insurance	\$ 527,000	\$ 291,696	\$ 818,696
Non-insurance	37,517	-	37,517
	<u>\$ 564,517</u>	<u>\$ 291,696</u>	<u>\$ 856,213</u>
December 31, 2015			
Amount payable	\$ 378,287	\$ 203,247	\$ 581,534
Amortization of prior period deferred premium acquisition costs	109,469	26,733	136,202
Deferred premium acquisition costs	(123,232)	(39,366)	(162,598)
Premium deficiency	30,067	45,755	75,822
Premium taxes, commission expense and deferred premium acquisition costs	<u>\$ 394,591</u>	<u>\$ 236,369</u>	<u>\$ 630,960</u>
Represented as:			
Insurance	\$ 364,256	\$ 236,369	\$ 600,625
Non-insurance	30,335	-	30,335
	<u>\$ 394,591</u>	<u>\$ 236,369</u>	<u>\$ 630,960</u>

19. Related Party Transactions

ICBC is a wholly-owned Crown corporation of the Province of B.C.

All transactions with the Province B.C.'s ministries, agencies, and Crown corporations occurred in the normal course of providing insurance, registration, and licensing for motor vehicles and are at arm's length, which is representative of fair value unless otherwise disclosed in these notes. The Corporation has elected to apply the exemption for government-related entities under IAS 24 *Related Party Disclosures*.

All transactions with the Corporation's subsidiary companies occurred in the normal course of investing in investment properties (note 2k).

The Corporation acts as an agent for the Ministry of Finance regarding the collection of provincial taxes on imported and privately sold used vehicles and motor vehicle-related debts. The Corporation is the sole provider of Basic insurance (note 1) in the Province of B.C. and, therefore, insures, at market rates, vehicles owned or leased by the Province of B.C. and its controlled entities. As a consequence of these relationships, the Corporation has, at any time, amounts owing to or from various government departments or ministries in the ordinary course of business.

The Corporation is also responsible for collecting and remitting in full to the Province of B.C. all driver license fees as well as vehicle-related fees for acquiring and distributing licence plates and decals including permits and other fees and fines. These collections are not revenue to the Corporation. The costs associated with the licensing and compliance activities conducted on behalf of the Province of B.C. are borne by the Corporation. These collections on behalf of and payments to the Province of B.C. are disclosed in the consolidated statement of comprehensive loss under non-insurance operations.

As at March 31, 2017, there is no Excess Optional capital to be transferred to the Province of B.C. (note 20) (2015 – \$138.1 million accrued as a payable).

The Corporation has defined key management as members of the Board of Directors and management employees at the Senior Director and equivalent level and above. The compensation for key management is shown below:

(\$ THOUSANDS)	15 months ended March 31 2017	12 months ended December 31 2015
Key management compensation		
Compensation and other employee benefits including restructuring costs	\$ 5,756	\$ 4,631
Pension and post-retirement benefits	932	480
	\$ 6,688	\$ 5,111

As at March 31, 2017, \$0.9 million (2015 – \$0.5 million) was payable to key management.

The Corporation contributes to several defined benefit pension and post-retirement plans. Transactions with these entities are disclosed in note 16. During the period ended March 31,

2017, the Corporation incurred \$4.3 million (2015 – \$3.4 million) in administrative expenses and investment management fees on behalf of these plans interest-free. In addition, the Corporation provides certain administrative, investment management, and office services to the plans at no charge. As at March 31, 2017, \$0.6 million (2015 – \$1.7 million) was payable to these plans for employer contributions.

Other related party transactions have been disclosed elsewhere in the notes to the consolidated financial statements.

20. Capital Management

The Corporation's capital is comprised of retained earnings, other components of equity, and NCI. The Corporation's objectives for managing capital are to maintain financial strength including the management of ongoing business risks and protect its ability to meet the obligations owed to policyholders and others.

As prescribed in the British Columbia Government's *Special Direction IC2 (IC2)* for Basic and the *Insurance Corporation Act (ICA)* for Optional insurance, the Corporation is guided by the capital management framework of the Office of the Superintendent of Financial Institutions Canada (OSFI), adopting OSFI's minimum capital test (MCT) as a means to measure and monitor the Corporation's capital levels. The MCT utilizes a risk-based formula to assess the capital adequacy of an insurance company by defining the capital available that is required to meet the minimum standards.

The Corporation has an internal corporate management target for MCT which is comprised of two components being the Basic and Optional insurance business MCT targets. For the Basic insurance business, the IC2 requires the Corporation, through BCUC oversight, to maintain capital available equal to at least 100% of MCT. BCUC has approved a Capital Management Plan for Basic insurance that includes a Basic management target MCT ratio at a higher level, sufficient to prevent capital falling below the 100% minimum threshold in most years (note 22) and an additional margin for relatively smooth and predictable rates. In the interest of keeping rates as low and affordable as possible for British Columbians, the Province of B.C. directed transfers of income from Optional to Basic insurance, enabling the Corporation to file for a 4.9% Basic rate increase in the 2016 revenue requirements application, which was subsequently approved by BCUC. To maintain Basic capital above legislative minimums, the Province of B.C. further directed a transfer from Optional insurance capital to Basic insurance.

Amendments made to IC2 in 2016 suspend the capital build and release provisions of the existing Capital Management Plan and keep the capital maintenance provision stable so that there is no impact on the Basic insurance rate change.

For the Optional insurance business, the ICA requires the Corporation to determine a capital management target that either is calculated by the Corporation based on the MCT guideline and the Guideline on Stress Testing issued by OSFI or as directed by the Province of B.C. At period end, when Optional capital is in excess of the management target, that amount is to be transferred to the Province of B.C. by July 1 of the following year (notes 19 and 22).

During 2016/17, the Corporation successfully completed and implemented a business renewal program known as the Transformation Program (TP) to address key business issues, including increased customer expectations regarding products, service, and price along with replacing aging technology systems. TP includes multiple projects to collectively help the Corporation achieve its strategy and future objectives. The funding required for this project was obtained from Optional capital. The TP reserve represents a component of retained earnings internally set aside for this program.

The reserve, net of costs expensed, is a Treasury Board approved deduction from the excess Optional capital transfer and is as follows:

(\$ THOUSANDS)	March 31 2017	December 31 2015
Transformation Program Reserve		
Balance, beginning of period	\$ 282,723	\$ 256,200
Reserve reallocation	-	53,798
Costs including depreciation expensed during the period	(38,271)	(27,275)
Balance, end of period	\$ 244,452	\$ 282,723

During 2016/17, there were \$30.0 million (2015 – \$52.5 million) of Transformation Program costs capitalized in property, equipment and intangible assets (notes 11 and 12).

In 2015, the Corporation determined that certain costs previously deducted from the reserve were not within the scope of TP. Therefore, the TP reserve was adjusted for an amount of \$53.8 million. As a result, a reallocation of \$27.7 million of expenses from Optional to Basic insurance was made in 2015 (note 22).

21. Contingent Liabilities and Commitments

a) Structured settlements

Certain injury claims are settled through the use of various structured settlements which require the Corporation to provide the claimant with periodic payments. The Corporation's injury claims are primarily settled through the use of structured settlements.

The Corporation purchases an annuity from an approved life insurance company to make these payments. In the event the life insurance company fails in its obligation, the risk to the Corporation is mitigated as the claimant will continue to receive payments, up to certain limits, from a not-for-profit organization that is funded by the insurance industry and endorsed by the Federal Government. The Corporation is only responsible for making payments for the excess, if any, between the claimant's annuity payments and the payment from the not-for-profit organization. At present, three federally licensed life insurance companies are approved for use by the Corporation. An insurance company is approved based on an ongoing analysis of total assets, credit rating analysis, and past service history. The present value of these structured settlements as at March 31, 2017 is approximately \$1.19 billion (2015 – \$1.19 billion), which are not recorded in the consolidated financial statements of the Corporation. Management does not believe any provision for credit risk is required in relation to these annuities as at March 31, 2017, as all approved life

insurance companies are rated investment-grade and outstanding balances are backed by the not-for-profit organization. The not-for-profit organization provides guarantees of up to \$2,000 a month or 85% of the promised monthly income benefit, whichever is higher. The Corporation's exposure to credit risk beyond the guarantee is insignificant. To date, the Corporation has not experienced any losses resulting from these arrangements.

b) Lease payments

The Corporation has entered into operating leases of certain rental properties for varying terms. The annual rental payments pursuant to these leases over the next five years and beyond and the net present value are as follows:

(\$ THOUSANDS)	March 31 2017		December 31 2015	
	Lease Payments	Net Present Value	Lease Payments	Net Present Value
Up to 1 year	\$ 9,545	\$ 9,290	\$ 9,914	\$ 9,629
Greater than 1 year, up to 5 years	23,581	21,648	19,017	17,386
Greater than 5 years	15,386	13,075	4,460	3,744
	<u>\$ 48,512</u>	<u>\$ 44,013</u>	<u>\$ 33,391</u>	<u>\$ 30,759</u>

The operating lease payments recognized as an expense during the period were \$18.9 million (2015 – \$14.7 million).

c) Other

As at March 31, 2017, the Corporation is committed to seven (2015 – seven) mortgage funding agreements totalling \$150.7 million (2015 – \$44.1 million).

In 2016/17, the Corporation invested into a real estate fund in which a commitment of \$69.7 million was made and as at March 31, 2017, \$53.7 million was funded.

In 2016/17, the Corporation has an investment in a limited partnership for bonds in which a commitment of \$100.0 million was made. As at March 31, 2017, \$40.0 million (2015 – nil) of the commitment was funded.

In 2016/17, the Corporation has made a commitment to invest \$150.0 million USD in a limited partnership for mortgages.

In 2015, the Corporation entered into an annually managed mainframe hosting services contract until 2022, with a total contract value of \$34.5 million.

In 2014, the Corporation has an investment in a limited partnership for real estate in which a commitment of \$75.0 million was made. As at March 31, 2017, \$46.0 million (2015 – \$20.9 million) of the commitment was funded.

In 2011, the Corporation entered into a commitment for annual telecommunication services until 2021, with a total contract value of \$50.6 million.

22. Regulation over Basic Insurance

As discussed in note 1, the Corporation is subject to regulation by BCUC. BCUC has jurisdiction over the Corporation's rates and services for Basic insurance, and responsibility for ensuring that the Basic insurance business does not subsidize the Corporation's Optional insurance business.

For the regulation of the Corporation's Basic insurance rates, BCUC is required to ensure that the rates are just, reasonable, not unduly discriminatory, and not unduly preferential. BCUC is required to fix rates on the basis of accepted actuarial practice, to pay for certain specified costs, to ensure the Corporation maintains and/or builds the required Basic insurance capital, to ensure rates are not based on age, gender or marital status, and to ensure increases or decreases in rates are phased in, in a stable and predictable manner.

As required by the regulatory framework, the Corporation maintains a capital management plan that is reviewed and approved by BCUC. This plan was last amended in May 2016, to include both the existing capital management solvency target and an additional margin of capital for a rate smoothing framework. The capital management plan allowed for exclusion of some or all of that fiscal loss years' loss costs forecast variance as a provision to release Basic insurance capital.

Basic insurance rate increases are also subject to the rate smoothing framework which limits the range of allowable rate changes, and instead uses Basic insurance capital to smooth through volatility in Basic insurance rates (note 9). The rate smoothing framework requires that, if circumstances should arise where, despite the capital management plan, Basic insurance capital is projected to fall below the regulatory minimum target, then in addition to filing with BCUC, the Corporation is also directed to immediately report to the Treasury Board and, in conjunction with the Treasury Board, develop an appropriate plan to address Basic insurance capital levels. As discussed below, these circumstances arose in both fiscal 2016/17 and 2015 periods.

BCUC initiates regulatory processes on its own initiative or upon application by the Corporation. It uses oral hearing, written hearing, or negotiated settlement processes to review applications and subsequently issue legally binding decisions.

The Corporation is required to incur a portion of BCUC's general operating expenses as well as its costs associated with each ICBC proceeding. BCUC can also order the Corporation to reimburse other proceeding participants for specified costs such as legal and expert witness fees.

BCUC sets rates for Basic insurance that allow it to achieve the required regulatory minimum MCT which has been set at 100%. In any case where the estimate or outlook for the quarterly and/or period end Basic MCT level is below 100%, BCUC directs the Corporation to file, within 60 days, a plan for the restoration of Basic MCT to be at or above the 100% regulatory minimum.

The Corporation filed a plan with BCUC on November 26, 2015, as the outlook for the period end Basic MCT level as of the third quarter of 2015 was below 100%. The plan stated that the Corporation would transfer \$450.0 million of capital from Optional insurance to Basic insurance in January 2016 in order to restore the Basic MCT level to be above the 100% regulatory minimum. This transfer was completed on January 1, 2016.

The Corporation filed another plan with BCUC on May 31, 2016, and further updated it on August 31, 2016, as the outlook for the period end Basic MCT level as of both the first and second quarters of 2016/17 was below 100%. The update stated that, in addition to the \$300.0 million income transfer referred to below, the Corporation needed to transfer \$172.0 million of capital from Optional insurance to Basic insurance during August 2016 in order to restore the Basic MCT level to be above the 100% regulatory minimum.

\$300.0 million of current period's income was transferred from the Corporation's Optional insurance business to the Basic insurance business. This transfer (\$201.0 million on November 1, 2016 and subsequent to period end, \$99.0 million - see note 24) occurred under the Province of B.C.'s direction and was accepted by the Corporation's Board of Directors. As a result of this transfer, the Corporation applied to the BCUC for a Basic insurance rate of 4.9%, which was lower than the otherwise required rate.

Allocation of Basic and Optional amounts

The Corporation operates its business using an integrated business model. The majority of premium revenues and costs are specifically identifiable as Basic or Optional (see note 1). The Corporation also delivers non-insurance services on behalf of the Province of B.C. Non-insurance activities include driver licensing, vehicle registration and licensing, violation ticket administration and government fines collection all of which are reported as Basic costs.

BCUC requires the Corporation to follow an approved financial allocation methodology with respect to allocating costs between the Basic insurance business, the Optional insurance business, and non-insurance services. Therefore, for those revenues and costs that are not specifically identified, a pro-rata method is used to allocate to each line of business based on the drivers of those revenues and costs, the degree of causality, and any BCUC directives. BCUC directives have been applied on a prospective basis.

24. Subsequent Events

On April 1, 2017, the Corporation transferred \$99.0 million of Optional insurance income to its Basic insurance as directed by the Province of B.C.

On April 18, 2017, ICBC and a Limited Partner acquired a real estate investment property for \$92.1 million, of which ICBC controls 90%.

Between April 1, 2017 and May 30, 2017, the Corporation entered into eleven agreements to provide mortgage funding totalling \$190.9 million.
