

BC Oil and Gas Commission

Financial Statements

March 31, 2020

Statement of Management Responsibility

The financial statements of the BC Oil and Gas Commission (the “Commission”) for the year ended March 31, 2020 have been prepared by management in accordance with Canadian public sector accounting standards and the integrity and objectivity of these statements are management’s responsibility. Management is also responsible for all of the notes to the financial statements and for ensuring that this information is consistent, where appropriate, with the information contained in the financial statements.

Management is also responsible for implementing and maintaining a system of internal controls to provide reasonable assurance that reliable financial information is produced.

The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and internal control and exercises these responsibilities through the Board. The Board reviews internal financial statements on a quarterly basis and external audited financial statements annually.

The external auditors, the Office of the Auditor General of British Columbia, conduct an independent examination, in accordance with Canadian auditing standards, and express their opinion on the financial statements. The external auditors have full and free access to the Audit Committee and management of the Commission and meet when required.

The accompanying Auditor’s Report outlines their responsibilities, the scope of their examination and their opinion on the financial statements.

On behalf of the Commission

INDEPENDENT AUDITOR'S REPORT

*To the Board of Directors of the Oil and Gas Commission, and
To the Minister of Energy, Mines and Petroleum Resources, Province of British Columbia*

Opinion

I have audited the accompanying financial statements of the Oil and Gas Commission (“the entity”) which comprise the statement of financial position as at March 31, 2020, and the statements of operations and accumulated surplus, changes in net debt and cash flows, for the year then ended and a summary of significant accounting policies and other explanatory information.

In my opinion, the financial statements present fairly, in all material respects, the financial position of the entity as at March 31, 2020, and the results of its operations, change in its net debt, and its cash flows for the year then ended in accordance with Canadian Public Sector Accounting Standards (PSAS).

Basis for Opinion

I conducted my audit in accordance with Canadian generally accepted auditing standards. My responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report. I am independent of the entity in accordance with the ethical requirements that are relevant to my audit of the financial statements in Canada, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Other Accompanying Information

Management is responsible for the other information. The other information comprises the information included in the Oil and Gas Commission 2019/20 Annual Service Plan Report but does not include the financial statements and my auditor's report thereon.

My opinion on the financial statements does not cover the other information accompanying the financial statements and I do not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information that I have obtained prior to the date of my auditor's report and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained during the audit or otherwise appears to be materially misstated.

Prior to the date of my auditor's report, I obtained the Oil and Gas Commission 2019/20 Annual Service Plan Report. If, based on the work I have performed on this other information, I conclude that there is a material misstatement therein, I am required to report that fact in this auditor's report. I have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements.

Those charged with governance are responsible for the oversight of the financial reporting process. Management is responsible for the preparation and fair presentation of the financial statements in accordance with Canadian Public Sector Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting when the entity will continue its operations for the foreseeable future.

Auditor's Responsibilities for the Audit of Financial Statements

My objectives are to obtain reasonable assurance about whether the entity's financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement, when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decision of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

Stuart Newton, CPA, CA
Assistant Auditor General

The accompanying notes are an integral part of these statements.

1. The Oil and Gas Commission

The Commission was established under the *Oil and Gas Commission Act* on July 30, 1998 to regulate non-federal oil and gas activities, having regard to environmental, economic and social values, encourage participation of Indigenous communities, and advance safe and efficient practices in the industry. The Commission is accountable for delivering initiatives and programs that serve to minimize the environmental impact of oil and gas activities in British Columbia. The Commission and its purposes were continued in the *Oil and Gas Activities Act* which came into force October 4, 2010.

The Commission is funded through:

- Levies on oil and gas production;
- Fees charged in respect of permit applications, transfers and amendments;
- Annual pipeline levies; and
- Annual orphan liability levies.

The Commission is exempt from federal and provincial income taxes.

2. Significant accounting policies

Basis of accounting

These financial statements are prepared by management in accordance with Canadian public sector accounting standards.

Financial instruments

The Commission reports its financial instruments at cost or amortized cost.

Tangible capital assets

Capital assets are recorded at cost. The costs, less estimated residual value, of the tangible assets, are amortized on a straight-line basis over the estimated useful life of the assets at the following annual rates:

Capital assets	Rate
Tenant improvement	over the lease term
Furniture	10%
Computer hardware	33%
Operating equipment	10% - 20%
Vehicles	20%
Business systems development	10% - 33%
Computer software	20% - 33%

Computer software includes satellite imagery which is being amortized on a straight-line basis at an annual rate of 20%.

2. Significant accounting policies (continued)

Revenue recognition

Revenues are recognized in the period in which the transaction or events occurred that give rise to the revenues. All revenues are recorded on an accrual basis. Revenue related to fees or services received in advance of the fee being earned or the service being performed is deferred and recognized when the fee is earned or service performed.

Production levies

All production levy revenue authorized and collected under the *Oil and Gas Activities Act* is first paid to the Minister of Finance. The Province is required to transfer this amount of revenue to the Commission in full. This revenue source is calculated based on production of oil and gas, and is also recognized as revenue at point of production. Production levies can be used to fund operations or orphaned sites.

Annual pipeline levies

Annual pipeline levies are billed and recognized based on length and diameter of pipe owned at March 31 of the applicable fiscal year.

Annual orphan liability levies

Annual orphan liability levies are billed and recognized based on a permit holder's deemed liability for permitted wells and facilities as at April 1 of the applicable fiscal year.

Application fees

General application fees are billed upon submission while amendment application fees are billable upon completion of the review process. Fees for major projects are billable in installments. All application fee revenue is recognized in the period it is earned.

Expenses

Expenses are reported on an accrual basis. The cost of all goods consumed and services received during the year is expensed. Grants are recorded as expenses when the payment is authorized and eligibility criteria have been met by the recipient. Reclamation costs are estimated and accrued when determinable.

Prepaid expenses

Prepaid expenses include flight passes, subscriptions, insurance, property taxes and other general prepaid expenses and are charged to expense when used or over the periods expected to benefit from the expenditures.

Employee future benefits – employee benefit plan

The Commission and its employees contribute to the Public Service Pension Plan in accordance with the *Public Service Pension Plans Act*. Defined contribution plan accounting is applied because sufficient information is not available to apply defined benefit accounting. Contributions are expensed as they become payable.

2. Significant accounting policies (continued)

Employee future benefits – future retirement allowance liability

The Commission accrues for future retirement allowances as provided under the collective agreements and terms of employment. The accrual as at March 31, 2020 is determined based on service and best estimates of retirement ages, expected future salary and wage increases, long term inflation rates and discount rates. The estimates are also based on assumptions about future events.

Liability for contaminated sites

Contaminated sites result from contamination by a chemical, organic or radioactive material or live organism that exceeds an environmental standard, being introduced into air, soil, water or sediment. A liability for restoration of contaminated sites is recognized when the Commission accepts responsibility for the restoration of an orphan site, contamination at the orphan site exceeds the environmental standard and a reasonable estimate of the amount can be made. Uncertainty of a potential liability for orphan sites may exist when there are ongoing insolvency or court proceedings. The Commission may recognize a contingent liability prior to formal designation of an orphan site where the outcome of proceedings is assessed to likely result in sites becoming orphaned.

3. Investments

Investments consist of term deposits which are liquid short term investments with maturity dates of one year or less from the date of acquisition and are carried on the Statement of Financial Position at the lower of cost or market value.

Investment funds are pooled from the following sources:

	March 31 2020	March 31 2019
Operations	\$ 11,234	\$ 4,884
Orphan site reclamation fund (note 11)	21,706	4,120
Security deposits - Liability Management Rating program (note 4)	26,207	45,824
	\$ 59,147	\$ 54,828

4. Security deposits

On October 28, 2010, the Commission established a Liability Management Rating (LMR) program. The objective of the LMR program is to ensure that permit holders carry the financial risk of their oil and gas operations through to regulatory closure. The Commission, through the LMR program, undertook the responsibility to regularly assess security deposits and provide refunds. The Commission holds \$144,674 (2019: \$140,634) in security deposits, of which \$26,207 (2019: \$45,825) is held in cash and/or investments and \$118,467 (2019: \$94,809) in the form of irrevocable letters of credit which are not recorded in these financial statements. Security deposits are restricted for use in settling potential permit holder restoration obligations. In fiscal 2020, the Commission recovered \$16,432 (2019: \$1,871) from security deposits to satisfy restoration obligations of permit holders.

5. Accounts receivable

	March 31 2020	March 31 2019
Production levies receivable	\$ 8,602	\$ 9,768
Annual pipeline levies receivable	3,940	3,688
Fees	593	1,977
Other receivables	665	839
	\$ 13,800	\$ 16,272

Production levies are collected and processed by the provincial government. At any point in time, a portion of levies receivable by the Commission is payable by industry, and a portion is payable by the Province (note 6).

6. Due from Government

	March 31 2020	March 31 2019
Levies collected	4,080	2,763
Recoveries and other	587	358
	\$ 4,667	\$ 3,121

7. Accounts payable and accrued liabilities

	March 31 2020	March 31 2019
Accounts payable and accrued liabilities	5,644	1,473
Salaries and benefits payable	2,936	2,471
	\$ 8,580	\$ 3,944

Employee leave entitlements

As of March 31, 2020, the value of employee entitlements to vacation, other leave and compensatory time off, plus related benefits, in accordance with collective agreements and terms of employment was \$950 (2019: \$870). This amount is included in salaries and benefits payable.

8. Employee future benefits

Employee benefit plan

The Commission and its employees contribute to the Public Service Pension Plan, a jointly trustee pension plan. The Public Service Pension Plan Board of Trustees, representing plan members and employers, is responsible for overseeing the management of the plan, including investment of the assets and administration benefits. Basic pension benefits are based on a formula. The plan has approximately 64,300 active plan members, 49,500 retired plan members, and 18,800 inactive members.

8. Employee future benefits (continued)

Employee benefit plan (continued)

Every three years an actuarial valuation is performed to assess the financial position of the plan and the adequacy of the funding. The latest actuarial valuation as at March 31, 2017, indicated a funding surplus of \$1.896 billion for basic pension benefits. Employers participating in the plan record their pension expense as the amount of employer contributions made during the fiscal year (defined contribution pension plan accounting). This is because the plan records accrued liabilities and accrued assets for the plan in aggregate, and therefore there is no consistent and reliable basis for allocating the obligation, assets and cost to individual employers participating in the plan.

The total amount paid into this pension plan by The Commission for the year ended March 31, 2020 for employer contributions was \$2,450 (2019: \$2,282).

Future retirement allowance liability

The liability as reported on the statement of financial position is as follows:

	March 31 2020	March 31 2019
Accrued retirement obligation		
Balance at beginning of year	\$ 693	\$ 605
Current benefit cost	66	58
Interest	31	30
Amortization of actuarial loss	25	24
Benefits paid	(54)	(24)
Balance at end of year	\$ 761	\$ 693
Actuarial retirement obligation		
Accrued benefit obligation	\$ 761	\$ 693
Unamortized actuarial loss	335	284
Balance at end of year	\$ 1,096	\$ 977

The significant actuarial assumptions adopted in measuring the Commission's accrued retirement obligations are as follows:

	2020	2019
Discount rate	2.45%	3.10%
Wages and salary escalation	2.00%	2.00%

Over time, changes in assumptions and actual experience compared to expected results will cause actuarial gains and losses in future valuations. The unamortized actuarial loss on future payments is amortized over the estimated average remaining years of service of the employee group which has been determined to be approximately 14 years at March 31, 2020 (2019: 14 years).

9. Due to Indigenous communities

Due to Indigenous communities includes management’s best estimate of expected liability to a number of Indigenous communities. The Commission works closely with Indigenous communities and negotiates consultation agreements and Memoranda of Understanding to establish formal consultation processes for oil and gas activities. These agreements provide resources for Indigenous communities’ capacity to participate in the consultation processes as well as set out responsibilities of the parties involved.

10. Deferred revenue

Deferred revenue consists of unearned application fees and major application revenue. The change in the deferred revenue balance is as follows:

	Balance at beginning of year	Receipts during year	Transferred to revenue	Balance at end of year
Fees	\$ 1,559	11,932	(12,459)	\$ 1,032

11. Liability for Orphan Sites

The Commission administers the Orphan Site Reclamation Fund (OSRF). The OSRF was created on April 1, 2006 as a means for industry to pay for restoration of orphaned oil and gas sites and for related costs. Revenue for the OSRF is derived from production levies, orphan liability levies and security deposits. Effective April 1, 2019, Bill 15 (Energy, Mines and Petroleum Resources Statutes Amendment Act, 2018, S.B.C 2018 c.15, (“the Act”)), was enacted and the Oil and Gas Activities Act was amended to provide the ability to secure funds for orphan site restoration, when and as they are required, by replacing the orphan site restoration tax with a levy to be paid by BC regulated companies based on their share of the potential restoration costs in the province.

The OSRF has assets of \$23,904 (2019: \$7,895) to pay for costs associated with orphan sites. During the year, the number of designated orphan sites increased from 346 to 357. Of the designated sites, 56 (2019: 22) have been substantially restored, with the remainder to undergo restoration as resources permit. The Commission continues to monitor other potential orphan sites.

The Commission has recognized a contingent liability related to ongoing receivership proceedings of a major permit holder. Commission management has determined that it is likely the receivership process will conclude with 401 sites becoming orphaned with an estimated obligation of \$53,100. Security of \$13,735 exists to offset the future costs. Subsequent to the date of the financial statements the receivership process concluded and the 401 sites were formally designated.

The Commission determined the liability for orphan sites based on the Commission’s obligation to ensure public and environmental safety. The liability reflects the costs required to bring the sites up to a standard where the environment and the public are protected. The liability for known orphan sites is estimated using expected abandonment and restoration costs for these specific sites, under expected conditions based on known characteristics of each site. Additional potential liability for orphan sites could result from contingencies for delays due to weather, problematic plugging activities, or unforeseen sources of contamination. These factors are estimated based on site characteristics and are disclosed in the measurement uncertainly note.

The estimation of the liability does not include discretionary reclamation costs. Full reclamation costs for orphan sites is estimated to be in the range of \$133,000 to \$217,000.

Estimated costs have not been net present valued as the related costs are not expected to occur over an extended long term period.

Included in the net book value of other systems development are assets not being amortized of \$1,661 (2019: \$216) as they have not yet been completed and put into use.

13. Contractual obligations

The Commission has entered into a number of multiple-year contracts for the delivery of services, the construction of assets, and operating leases. These contractual obligations will become liabilities in the future when the terms of the contract are met. Disclosure relates to the unperformed portion of the contracts.

	2021	2022	2023	2024	2025	Thereafter
\$	7,872	\$ 4,374	\$ 4,375	\$ 4,429	\$ 3,988	\$ 12,756

The Commission is also committed to make certain payments under Indigenous capacity agreements.

14. Contingent liabilities

The Commission may become contingently liable with respect to pending litigation and claims in the normal course of operations. In the opinion of management, any liability that may arise from pending litigation would not have a material effect on the Commission's financial position or results of operations.

See Note 11 regarding potential reclamation costs related to the Orphan Site Reclamation Fund.

15. Measurement uncertainty

The preparation of financial statements in accordance with Canadian public sector accounting standards require management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Significant areas requiring the use of management estimates relate to levy production volumes, revenue deferrals, rates for amortization, estimated orphan restoration and estimated employee future benefits. Actual results could differ from these estimates.

	Reported	Low	High
Liability for orphan sites	\$81,197	\$60,000	\$116,000

Liability for known orphan sites is estimated using expected abandonment and restoration costs for these specific sites, under expected conditions based on known characteristics of each site. The estimation of the liability does not include contingencies for delays due to weather, problematic plugging activities, or unforeseen sources of contamination. Additional potential liability for the designated sites resulting from these contingencies is also estimated based on site characteristics. Changes in this estimate would also affect orphan reclamation expenses and annual and accumulated surpluses.

16. Related party transactions

The Commission is related through common ownership to all Province of British Columbia ministries, agencies and crown corporations, school districts, health authorities, hospital societies, universities and colleges that are included in the provincial government reporting entity.

The financial statements include the following transactions with related parties of the Province of British Columbia:

	March 31 2020	March 31 2019
Revenues:		
Recoveries	\$ 45	\$ 80
Miscellaneous	185	165
	\$ 230	\$ 245
Expenses:		
Salaries and benefits	\$ 1,253	\$ 916
Building occupancy	153	189
Professional services and training	823	490
Telecommunications and information systems	120	189
Travel and vehicle costs	17	25
Office supplies and equipment	37	33
	\$ 2,403	\$ 1,842
Tangible capital assets		
Additions	\$ 628	\$ 188

In addition, the Commission is related to the BC Oil and Gas Research and Innovation Society (BC OGRIS) by virtue of a member of the Commission’s senior management serving on the board of directors of BC OGRIS.

Related party transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

17. Expense by Object

	Oil and Gas Activities Regulation	Orphan Site Reclamation Fund	March 31 2020	March 31 2019
Salaries and benefits	31,482	616	32,098	28,520
Indigenous communities	5,312	-	5,312	5,942
Building occupancy	4,452	-	4,452	5,004
Professional services and training	2,475	1	2,476	2,181
Amortization	4,729	-	4,729	4,293
Travel and vehicle costs	1,818	37	1,855	2,237
Telecommunications and information systems	2,365	-	2,365	2,186
Grants	45	-	45	77
Reclamation	1,923	57,371	59,294	20,680
Office supplies and equipment	611	1	612	546
Bad debts	129	178	307	62
	\$ 55,341	\$ 58,204	\$ 113,545	\$ 71,728

18. Subsequent events

After the date of these financial statements, three permit holders have indicated they are preparing for creditor protection. Under the Commission's Liability Management Rating (LMR) program security of \$2.2 million is held from these permit holders and the permit holders have been calculated to hold deemed liabilities of \$9.0 million. The LMR program is used by the Commission in determining security requirements of permit holders. The Commission is not able to reasonably estimate the associated liability for orphan sites, if any, as the outcome of creditor protection actions is not determinable at this time. Calculated deemed liabilities under the LMR program are provided in this note as a proxy estimate only and may not reflect the extent of potential financial impacts. Since these events occurred after the date of the financial statements no accrual for potential orphan designations has been included.

On April 17, 2020, the Government of Canada announced funding to support clean up of orphan and inactive oil and gas wells across the Province of British Columbia. Funds totalling \$15 million will be transferred to the Commission's Orphan Fund to carry out an Orphan Sites Supplemental Reclamation Program (the "Program") for the restoration of orphan sites that is incremental to existing funding paid by BC regulated companies. The Program will be completed by March 31, 2022.

19. Budgeted figures

Budgeted figures have been provided for comparison purposes and have been derived from the final budget approved by the Board of Directors on March 7, 2019. Amounts may differ from the budget prepared earlier for the purposes of the Annual Service Plan.

20. Comparative figures

Certain comparative figures have been restated to conform to the current year's presentation.

21. Financial risk management

It is management's opinion that the Commission is not exposed to significant credit, liquidity or interest rate risks arising from its financial instruments.

Credit Risk - Credit risk is the risk of financial loss to the Oil and Gas Commission if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The Oil and Gas Commission's exposure to credit risk related to the value of accounts receivable in its normal course of business is managed by minimizing the amount of transactions which require recovery. The Commission continually monitors and manages the collection of receivables.

The Commission's cash and investments are held at Canadian chartered banks and credit unions and irrevocable letters of credit are held with Schedule I, II or III banks; Canadian credit unions; and government owned financial institutions. The Commission is not exposed to significant credit risk.

Liquidity Risk - Liquidity risk is the risk that the Oil and Gas Commission will have difficulty in meeting its financial obligations when they come due. The Oil and Gas Commission manages liquidity risk by continually monitoring cash flows.

Interest rate risk - Interest rate risk is the risk that the Commission's investments will change in fair value due to future fluctuations in market interest rates. The Commission's investments are measured at cost. Income they generate varies as market interest rates vary. All other financial instruments are non-interest bearing. The Commission mitigates this risk by monitoring interest rates.

COVID-19 - The Provincial Health Officer declared a public health emergency on March 17, 2020 in response to the COVID-19 pandemic. The Commission has taken steps to protect its staff, stakeholders and Indigenous communities, while maintaining operations. Risks to the Oil and Gas industry, which the Commission regulates and receives its funding from, include low market prices and a tightened ability to obtain financing. The impact of those risks on the Commission's financial statements are not measurable at this time. Commission management will continue to monitor the impact of the pandemic on its operations and the industry it regulates.
