Ministry of Forests Recreation Sites & Trails

The Ministry of Forests is offering the opportunity to interested groups, organizations or individuals to manage, through agreements, over 1,300 recreation sites and 480 trails. The following lists show the breakdown between managed and unmanaged sites and trails by forest region and district.

Managed sites or trails will receive at least a minimum amount of service to maintain and clean the facilities and infrastructure, and to address public safety and environmental concerns. Unmanaged sites or trails will not receive any scheduled service or maintenance. Campers at unmanaged sites are asked to respect the forest environment and neighbouring campers, confine fires to fire rings and pack out their garbage.

Groups, organizations or individuals interested in the opportunity to take over the management of any of the sites or trails are encouraged to contact the relevant forest district office. [Click here](#) for the list of district offices.

This list is also posted on the ministry's Web site at <http://www.for.gov.bc.ca/hfp/rec/rec.htm> and will be updated if the management category for a site or trail changes. Refer to the Web site for the most current information.
