

## FACT SHEET

July 15, 2009

### VIHA SERVICE AND PROGRAM LEVELS UP SIGNIFICANTLY

- The Vancouver Island Health Authority was formed in December 2001 by combining the Capital Health Region, Central Vancouver Island Health Region and Community Health Councils on Northern Vancouver Island and remote areas of the coastal mainland.
- Since that time, health care services have realized significant increases in service levels and volumes, as well as in the range of services provided.
- Overall, spending has increased 34 per cent. This increased investment, along with strategic targeting of resources in high needs/growth areas, improved technologies, efficiencies and innovation, has resulted in significant enhancements in program and service volumes:

SERVICE AREA:	2003/04*	2008/09	CHANGE
<b>ACUTE (HOSPITAL) CARE:</b>			
Number of babies born:	5,665	6,047	↑ 6.7%
