

2015 BRITISH COLUMBIA WINE GRAPE CROP REPORT

FOREWORD

BC wineries are required by regulation to report the number of tons of BC mainland wine grapes they crushed each year to the BC Wine Grape Council for levying purposes. For the 2015 vintage, wineries were also asked to provide, voluntarily and in strict confidence, data on the varietal tonnages, growers and prices per ton and whether the grapes were purchased at arm's length or winery-owned.

The detailed tonnage and price data for the 2015 survey was gathered by Louise Corbeil over a three-month period ending February 29, 2016. The data was then aggregated and compiled by Manfred Freese, PhD., and formatted for distribution by Lindsay Kelm.

We would like to express our thanks to the BC Wine Grape Council and the BC Wine Authority for their cooperation and assistance.

At the request of the BC Grapegrowers' Association, a 'Section 9100' audit of the survey data and report was carried out by the Chartered Professional Accountants firm, Reid Hurst Nagy Inc. A copy of their report is included on page 2 of this report.

Funding for this report was provided by the BC Grapegrowers' Association and the BC Wine Institute.

REPORT ON SPECIFIED AUDITING PROCEDURES CARRIED OUT ON THE 2015 WINE GRAPE CROP SURVEY REPORT

To: The Members of The British Columbia Grapegrowers' Association

We have been requested to apply the following specified auditing procedures to financial information other than financial statements:

1. Test a sample of the data summarized for the 2015 Wine Grape Crop Survey Data spreadsheet for accuracy and completeness.
2. Recalculate the 2015 figures reported on the 2015 Wine Grape Crop Survey Report from the 2015 Wine Grape Crop Survey Data.

Our specified auditing procedures were performed in April 2016 in accordance with the standards of the Canadian Chartered Professional Accountants' Assurance Handbook Section 9100, "Reports on the Results of Applying Specified Auditing Procedures to Financial Information other than Financial Statements."

As result of applying the above procedures, we found no exceptions. However, the procedures performed do not constitute an audit or review of the financial information, and therefore we express no opinion on this financial information. These procedures would not necessarily reveal all material errors with respect to the financial information.

This report is for use solely by the Association to verify the accuracy of the compiled information and report and not to be referred to or used for any other purpose.
