

Consumer Price Index ♦ February 2012

Consumer Price Index (2002=100)

Highlights

- British Columbia's Consumer Price Index (CPI) increased 1.7% from February 2011. BC continues to hold the lowest inflation across the provinces, though Manitoba also records 1.7% for February. Alberta trails behind at 1.9%, while Quebec (+3.2%) and Prince Edward Island (+3.1%) recorded the highest inflation among the provinces. Nationally, consumer prices increased 2.6% from February 2011.
- Among the Metropolitan areas, Quebec City (+3.3%) and Toronto (+3.1%) experienced the highest year-over-year inflation. Victoria (+1.6%) recorded the lowest inflation, beating out three other western metro areas; Calgary, Saskatoon and Winnipeg all posted 1.7% inflation from a year ago.
- British Columbia's overall Clothing & Footwear index rose 5.7% with Women's Clothing (+9.0%) the primary factor. Transportation observed a 3.3% increase driven by Inter-City Public Transportation (+6.7%) and Gasoline (+4.2%). Otherwise flat to negative shelter costs were buoyed by the rising cost of Fuel Oil & Other Fuel (+12.0%). BC's Food index increased 3.4%; pressed by Coffee & Tea (+12.2%) and Non-Alcoholic Beverages (+10.1%).
- BC's all items CPI (excluding energy) was up 1.5% from last year. The comparable figure for Canada was a 2.2% increase.

Note: Statistics Canada will release the March Consumer Price Index on April 20, 2012.

2002=100	All-Items Index February 2012	% Change from	
		January 2012	February 2011
Canada	121.2	0.4	2.6
BC	117.2	0.3	1.7
Vancouver	118.4	0.4	2.1
Victoria	116.1	0.3	1.6
Core Canada ¹	118.9	0.4	2.3
BC (excluding energy)	114.7	0.3	1.5

BC and Canada Inflation Trend

(% change, same month of previous year)

2002=100	Latest 12-month Average Index (ending in February 2012)	Latest 12-month Average % Change	2011 Annual Average % Change
Canada	120.4	3.0	2.9
BC	116.9	2.3	2.4
Vancouver	117.9	2.2	2.3
Victoria	115.8	2.1	2.1

¹The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

Consumer Price Index—Terms and Definitions

Base Effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Twelve-Month Percent Changes

Also referred to as “year-over-year”, twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging

indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Harmonized Sales Tax

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.
