

Consumer Price Index ♦ April 2012

Consumer Price Index (2002=100)

Highlights

- British Columbia's Consumer Price Index (CPI) increased 1.6% from April 2011, a holding trend from the previous month. Looking at the provinces, Alberta (+0.8%) recorded the lowest inflation overall; British Columbia (+1.6%) followed along with Manitoba (+1.8%). Newfoundland & Labrador observed the highest overall inflation at 3.0%, while Nova Scotia and New Brunswick both registered a 2.6% increase from the previous year. Nationally, consumer prices increased 2.0% from April 2011.
- Across the Metropolitan areas Calgary recorded the lowest inflation at 0.9%, followed by Edmonton at 1.0%. Victoria registered 1.6%, the next lowest inflation among the western areas. The majority of the eastern metro areas continued to record higher inflation than the rest of the country; particularly Saint John (+2.5%), Halifax, Quebec City & Regina (+2.4%), while St. John's (+3.1%) noted the highest inflation among all the metro areas.
- Most noteworthy within the all-items basket is Clothing & Footwear (+6.8%), as footwear trends heavily with a 7.8% increase. Electricity increased another 11.9% from the previous year, although combined with significant decreases to piped gas (-6.7%) overall shelter inflation was pared to a 0.4% increase. Amid the food index, fresh fruit & vegetables recorded a 10.5% increase as we border on the summer months.
- BC's all items CPI (excluding energy) was up 1.4% from last year. The comparable figure for Canada was a 2.1% increase.

Note: Statistics Canada will release the May Consumer Price Index on June 22, 2012.

2002=100	All-Items Index	% Change from	
		March 2012	April 2011
	April 2012		
Canada	122.2	0.4	2.0

Vancouver	119.4	0.3	1.9
Victoria	117.3	0.3	1.6
Core Canada ¹	119.7	0.4	2.1
BC (excluding energy)	115.1	0.2	1.4

BC and Canada Inflation Trend

(% change, same month of previous year)

2002=100	Latest 12-month Average Index (ending in April 2012)	Latest 12-month Average % Change	2011 Annual Average % Change
Canada	120.8	2.7	2.9
BC	117.2	2.1	2.4
Vancouver	118.2	2.1	2.3
Victoria	116.1	1.9	2.1

¹The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

Consumer Price Index—Terms and Definitions

Base Effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

Twelve-Month Percent Changes

Also referred to as “year-over-year”, twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging

indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Harmonized Sales Tax

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.
