

Consumer Price Index ♦ November 2012

Consumer Price Index (2002=100)

Highlights

- British Columbia's year-over-year inflation rate stood at 0.1% in November, the lowest rate recorded since November 2009. The cost of energy products (-2.1%) fell, such that excluding energy, the overall Consumer Price Index (CPI) would have been higher (+0.3%). Rental accommodation prices (+1.7%) continued to climb, while the price of owned accommodation (-1.4%) fell for the fourteenth straight month. Drivers paid substantially less at the pump (-4.7%) in November pushing the cost of operating a vehicle down (-0.7%) for the first time since October 2009. Overall transportation costs were 0.9% lower. Public transportation, however, remained higher (+1.3%) than in the same month of 2011.

The cost of food rose 1.5% in November, as both grocery bills (+1.3%) and restaurant meals (+2.0%) were pricier. Prices for health & personal care (+0.1%) were slightly higher than in November last year. However, British Columbians did enjoy lower prices for clothing & footwear (-0.4%) and recreational equipment & services (-3.2%).

The inflation rate in Vancouver (+0.2%) was slightly higher than the provincial average, while prices in Victoria (-0.2%) were lower than in the same month of 2011.

- The Canadian inflation rate was 0.8% in November, the smallest year-over-year increase recorded since October 2009. Consumer price increases slowed in all provinces except Alberta. Prince Edward Island (+1.5%) and Quebec (+1.5%) recorded the highest rates in the country, while residents of British Columbia (+0.1%) enjoyed the mildest expansion, followed by New Brunswick (+0.6%) and Alberta (+0.6%).

Note: Statistics Canada will release the December Consumer Price Index on January 25, 2013.

| 2002=100 | All-Items Index | % Change from | |
|--------------------------|-----------------|---------------|---------------|
| | | October 2012 | November 2011 |
| | November 2012 | | |
| Canada | 121.9 | -0.2 | 0.8 |
| BC | 117.6 | -0.3 | 0.1 |
| Vancouver | 118.9 | -0.3 | 0.2 |
| Victoria | 116.3 | -0.4 | -0.2 |
| Core Canada ¹ | 120.2 | 0.0 | 1.2 |
| BC (excluding energy) | 115.2 | 0.1 | 0.3 |

BC and Canada Inflation Trend

(% change, same month of previous year)

| 2002=100 | Latest 12-month Average Index (ending in November 2012) | Latest 12-month Average % Change | 2011 Annual Average % Change |
|-----------|---|----------------------------------|------------------------------|
| Canada | 121.6 | 1.6 | 2.9 |
| BC | 117.8 | 1.2 | 2.4 |
| Vancouver | 119.0 | 1.4 | 2.3 |
| Victoria | 116.6 | 1.1 | 2.1 |

¹The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

Consumer Price Index—Terms and Definitions

Base Effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Twelve-Month Percent Changes

Also referred to as “year-over-year”, twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging

indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Harmonized Sales Tax

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.
