

Consumer Price Index

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: MARCH 2013

CONSUMER PRICE INDEX (2002=100)

HIGHLIGHTS

British Columbia's year-over-year inflation rate was 0.5% in March, with higher prices for food (+2.5%) driving much of the in-crease. Excluding food prices, the Consumer Price Index (CPI) rose 0.1%. Consumers also paid more for household operations & furnishings (+2.7%) and clothing & footwear (+0.8%), but prices fell in the five remaining major components of the CPI.

Grocery bills (+2.5%) and restaurant prices (+2.6%) continued to rise. Fresh vegetable (+9.2%) and fruit (+14.0%) prices surged, in-creasing for the second month in a row. Prices for coffee & tea (+4.2%), meat (+2.3%), fish & other seafood (+2.2%), and dairy products & eggs (+0.6%) remained on the upswing, while consumers paid less for non-alcoholic beverages (-6.2%) and other food products (-0.8%).

The cost of shelter (-0.6%) continued to de-cline, a result of lower costs associated with owned accommodation (-1.7%), as rented accommodation (+1.5%) and utility (+1.9%) prices continued to rise.

Transportation prices dipped (-0.1%), as consumers paid less for gasoline (-0.6%) and public transit (-1.1%). Health & personal care (-0.2%) prices fell for the fourth

consecutive month, while recreation, education & reading (-0.8%) prices were down for the first time in eight months. Prices for alcoholic beverages and tobacco were virtually unchanged.

*

B.C. (+0.5%) recorded the lowest inflation rate in Canada, well below the national figure (+1.0%), while Manitoba (+2.3%) recording the largest jump. In Vancouver (+0.8%) and Victoria (+0.2%), prices remained relatively stable.

Note: Statistics Canada will release the April Consumer Price Index on May 17, 2013.

2002=100	All-Items Index	% Change from	
		February 2013	March 2012
	March 2013		
Canada	122.9	0.2	1.0
BC	118.5	0.2	0.5
Vancouver	120.0	0.2	0.8
Victoria	117.1	0.2	0.2
Core Canada ¹	120.9	0.2	1.4
BC (excluding energy)	115.7	0.1	0.7

¹ The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC AND CANADA INFLATION TREND

(% change, same month of previous year)

2002=100	Latest 12-month Average Index (ending in March 2013)	Latest 12-month Average % Change	2012 Annual Average % Change
Canada	122.0	1.2	1.5
BC	118.0	0.8	1.1
Vancouver	119.3	1.1	1.3
Victoria	116.7	0.7	1.0

TERMS AND DEFINITIONS

BASE EFFECT

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

TWELVE-MONTH PERCENT CHANGES

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

ANNUAL AVERAGE INDEX

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

LATEST TWELVE-MONTH AVERAGE INDEX

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Consumer Price Index – continued...

HARMONIZED SALES TAX

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.
