

Consumer Price Index

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: APRIL 2013

CONSUMER PRICE INDEX (2002=100)

HIGHLIGHTS

Consumer prices in British Columbia fell (-0.8%, year-over-year) in April for the first time since October 2009. The province's return to the PST, along with lower prices for gasoline (-3.3%) and food (-0.3%) drove the decline. Prices for food purchased from stores (+1.6%) were up, with fresh fruit (+11.6%), vegetable (+10.5%), coffee & tea (+4.0%), and meat (+1.0%) prices continuing to rise, while consumers paid notably less for restaurant meals (-4.3%).

The cost of shelter (-1.1%) continued to decline, a result of lower costs associated with owned accommodation (-2.4%), as rented accommodation (+1.3%) and utility (+1.5%) prices maintained an upward trend.

Household operations & furnishings (+1.0%), and alcoholic beverages & tobacco (+0.2%) were the only components of the CPI that recorded price increases. Transportation prices fell (-1.2%) for the second consecutive month as gasoline prices dropped 3.3%, and consumers paid 1.4% less for public transit. Prices for clothing & footwear (-0.9%), health & personal care (-2.1%), and recreation, education & reading (-2.2%) all decreased.

*

Nationally, falling prices in B.C. (-0.8%) and New Brunswick (-0.2%) kept the national average (+0.4%) low, while Manitoba (+1.8%), PEI (+1.8%), and Alberta (+1.3%) recorded the highest inflation rates in the country. Consumer prices in Victoria (-1.3%) fell at a slightly faster rate than in Vancouver (-0.8%).

Note: Statistics Canada will release the April Consumer Price Index on May 17, 2013.

2002=100	All-Items Index	% Change from	
		March 2013	April 2012
	April 2013		
Canada	122.7	-0.2	0.4
BC	117.2	-1.1	-0.8
Vancouver	118.5	-1.3	-0.8
Victoria	115.8	-1.1	-1.3
Core Canada ¹	121.0	0.1	1.1
BC (excluding energy)	114.3	-1.2	-0.7

¹ The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC	117.9	0.6	1.1
Vancouver	119.2	0.8	1.3
Victoria	116.6	0.4	1.0

TERMS AND DEFINITIONS

BASE EFFECT

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

TWELVE-MONTH PERCENT CHANGES

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for

the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

ANNUAL AVERAGE INDEX

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

LATEST TWELVE-MONTH AVERAGE INDEX

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

HARMONIZED SALES TAX

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.
