

Consumer Price Index

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: NOVEMBER 2013

CONSUMER PRICE INDEX (2002=100)

HIGHLIGHTS

The year-over-year change in the province's consumer price index (CPI) was -0.2% in November. Since the repeal of the HST in April, the overall price level has remained below 2012 levels, as many services are no longer taxable.

The cost of food purchased from restaurants (-4.4%), owned accommodation (-1.8%), footwear (-4.0%), and health and personal care (-3.1%) were all lower than in November of 2012. The overall index was buoyed by food purchased from stores (+1.1%), rented accommodation (+1.0%), household operations and furnishings (+0.9%), clothing (+1.3%), transportation (+0.7%) and alcoholic beverages and tobacco products (+1.7%).

The strongest rise, year-over-year in November was for fresh vegetables (+12.6%), followed by fresh fruit (+9.3%). Only meat (-0.6%), other food products (-2.7%) and food purchased from restaurants (-4.4%) kept overall food prices (-0.6%) in check.

Overall shelter costs, which have been declining since mid-2012, continued to ease (-0.7%), largely because the price of owned accommodation remained on a downward path (-1.8%).

Looking back to 2002, the price of clothing and footwear in British Columbia (November Index=100.4) is largely

unchanged from the setting of the index in 2002 (2002=100) while alcohol and tobacco (Index=133.2) is up by one third and food (Index=127.1) and transportation (Index=124.6) are up by a quarter.

Overall, the cost of energy was up 1.3% from November 2012. Excluding energy prices, the overall price level moved down 0.3% in November.

Prices in Victoria (-0.3%) continued to deflate while prices in Vancouver (+0.1%) were unable to keep the overall provincial price level (-0.2%) positive. The year-over-year price level changes for Victoria and Vancouver were the lowest among all metropolitan areas in Canada.

*

Canada's inflation rate was 0.9% in November, as prices rose in every province and territory except British Columbia. Quebec's increase at 0.6% was the next lowest across the country. Inflation was highest in Prince Edward Island (+2.6%) and Manitoba (+2.4%).

Note: Statistics Canada will release the December Consumer Price Index and the 2013 Annual Consumer Price Index on January 24, 2014.

Consumer Price Index – continued...

2002=100	All-Items Index	% Change from	
		October 2013	November 2012
Canada	123.0	0.0	0.9
BC	117.4	-0.3	-0.2
Vancouver	119.0	-0.3	0.1
Victoria	116.0	-0.2	-0.3
Core Canada ¹	121.5	-0.1	1.1
BC (excluding energy)	114.8	-0.2	-0.3

¹ The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC AND CANADA INFLATION TREND

(% change, same month of previous year)

2002=100	Latest 12-month Average Index (ending in November 2013)	Latest 12-month Average % Change	2012 Annual Average % Change
Canada	122.7	0.9	1.5
BC	117.7	0.0	1.1
Vancouver	119.2	0.2	1.3
Victoria	116.3	-0.3	1.0

TERMS AND DEFINITIONS

BASE EFFECT

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

TWELVE-MONTH PERCENT CHANGES

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

ANNUAL AVERAGE INDEX

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Consumer Price Index – continued...

LATEST TWELVE-MONTH AVERAGE INDEX

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

HARMONIZED SALES TAX

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.

On April 1, 2013, the Harmonized Sales Tax came into effect in Prince Edward Island, while British Columbia returned to the Provincial Sales Tax and the Goods and Services Tax.
