

Consumer Price Index

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: DECEMBER 2013

CONSUMER PRICE INDEX (2002=100)

HIGHLIGHTS

British Columbia's consumer price index (CPI) was unchanged in December, relative to the same month of 2012. The province's inflation rate has been at or below zero since April, when the repeal of the HST resulted in lower consumer prices for many services that had previously been taxable. The inflation rate will continue to be affected by this change until April 2014.

Food prices remained below 2012 levels in December (-0.5%), largely because the cost of restaurant meals fell 4.0%. At the same time, British Columbians continued to pay more for food purchased from stores (+1.2%), with particularly large increases seen in the cost of fresh fruits (+7.1%) and vegetables (+9.2%).

Shelter costs remained on a downward path, shrinking (-0.4%) for a 19th straight month. The decline was largely due to lower prices for owned accommodation (-1.4%). Renters paid 0.9% more for housing than in December 2012, and the cost of water, fuel and other utilities was up 1.8%.

Transportation costs increased 1.4%, driven by higher prices for gasoline (+2.8%) and automotive insurance (+2.2%), together with a more modest increase in the cost of public transportation (+0.9%).

Consumers paid less for health and personal care products & services (-2.3%), recreation, education &

reading materials (-0.3%), and household operations & furnishings (-0.2%), but prices for clothing & footwear (+0.9%) were higher than in December 2012.

Energy costs rose 2.1%. Excluding the cost of energy, the overall price level in British Columbia was down 0.3%.

Victoria's CPI was also unchanged from December 2012. In Vancouver, the year-over-year inflation rate was 0.2%.

British Columbia's *annual* inflation rate (average for the year) was -0.1% in 2013. This marked the first time since 2009 (when prices were unchanged from 2008) that the overall price level has not increased—and the first decline in the annual CPI since 1980¹. Falling shelter costs, together with lower prices for various types of services helped keep a lid on the inflation rate during 2013.

Prices in Victoria were also down (-0.3%) in 2013. In Vancouver, the annual inflation rate was 0.2%.

*

Other parts of the country saw the overall price level rise (year-over-year) in December. The Canadian inflation rate was 1.2%, with PEI (+3.0%) and Newfoundland (+2.5%) posting the highest inflation rates in the country. At the other end of the spectrum were British Columbia and Quebec (+0.8%).

¹ 1980 is the first year for which provincial inflation rates are available.

Consumer Price Index – continued...

The Canadian *annual* inflation rate was 0.9% in 2013. British Columbia (-0.1%), Quebec (+0.7%) and New Brunswick (+0.8%) posted the lowest rates. Prices rose 2.2% in Manitoba, where an increase in the provincial sales tax rate put upward pressure on the inflation rate.

Note: Statistics Canada will release the January Consumer Price Index on February 21, 2014.

2002=100	Latest 12-month Average Index (ending in December 2013)	Latest 12-month Average % Change	2013 Annual Average % Change
Canada	122.8	0.9	0.9
BC	117.7	-0.1	-0.1
Vancouver	119.2	0.2	0.2
Victoria	116.3	-0.3	-0.3

2002=100	All-Items Index	% Change from	
		November 2013	December 2012
	December 2013		
Canada	122.7	-0.2	1.2
BC	117.0	-0.3	0.0
Vancouver	118.5	-0.4	0.2
Victoria	115.6	-0.3	0.0
Core Canada ¹	121.0	-0.4	1.3
BC (excluding energy)	114.4	-0.3	-0.3

¹ The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC AND CANADA INFLATION TREND

(% change, same month of previous year)

TERMS AND DEFINITIONS

BASE EFFECT

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

TWELVE-MONTH PERCENT CHANGES

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

ANNUAL AVERAGE INDEX

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use

Consumer Price Index – continued...

of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

LATEST TWELVE-MONTH AVERAGE INDEX

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

HARMONIZED SALES TAX

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.

On April 1, 2013, the Harmonized Sales Tax came into effect in Prince Edward Island, while British Columbia returned to the Provincial Sales Tax and the Goods and Services Tax.
