

Consumer Price Index

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: JANUARY 2014

.....

CONSUMER PRICE INDEX (2002=100)

HIGHLIGHTS

British Columbia's overall price level held steady for the second month in a row in January. Although the cost of energy products increased 2.7%, prices for other products were marginally lower (-0.2%) than in January 2013.

Consumers shelled out 0.9% less for food than in January 2013, largely because the cost of restaurant meals (-4.3%) remained well below 2013 levels. Grocery prices increased 0.7%, boosted by higher costs for fish and seafood products (+7.7%), fresh vegetables (+5.8%) and fresh fruits (+3.8%).

Shelter costs inched down (-0.1%) in January. A 1.0% increase in the cost of rented accommodation, together with higher prices for water, fuel and electricity (+2.3%), was more than offset by an ongoing decline in owned accommodation costs (-0.9%), as homeowners continued to benefit from lower mortgage interest and replacement costs.

Consumer prices for household operations and furnishings were unchanged in January, as was the cost of recreation, education and reading materials.

The transportation index rose 1.2%. The cost of private transportation continued to climb (+1.5%), boosted by higher prices for gasoline (+3.5%) and auto insurance (+2.2%). Prices for public transportation (-0.1%) were

little changed from a year earlier.

Health and personal care products and services cost consumers 2.6% less than in January 2013. The cost of alcoholic beverages and tobacco products increased 1.6%.

In Vancouver, the year-over-year inflation rate was a relatively modest 0.2%. Prices in Victoria inched down 0.1%.

*

The Canadian inflation rate was 1.5% in January, with prices increasing moderately in most parts of the country. PEI (3.2%), Alberta (+2.7%), and Manitoba (+2.6%) had the highest inflation rates.

Note: Statistics Canada will release the February Consumer Price Index on March 21, 2014.

Consumer Price Index – continued...

2002=100	All-Items Index	% Change from	
		January 2014	December 2013
Canada	123.1	0.3	1.5
BC	117.1	0.1	0.0
Vancouver	118.7	0.2	0.2
Victoria	115.7	0.1	-0.1
Core Canada ¹	121.3	0.2	1.4
BC (excluding energy)	114.5	0.1	-0.2

¹ The Core CPI for Canada: Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC AND CANADA INFLATION TREND

(% change, same month of previous year)

2002=100	Latest 12-month Average Index (ending in January 2014)	Latest 12-month Average % Change	2013 Annual Average % Change
Canada	123.0	1.0	0.9
BC	117.7	-0.1	-0.1
Vancouver	119.2	0.1	0.2
Victoria	116.3	-0.3	-0.3

TERMS AND DEFINITIONS

BASE EFFECT

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

TWELVE-MONTH PERCENT CHANGES

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

ANNUAL AVERAGE INDEX

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Consumer Price Index – continued...

LATEST TWELVE-MONTH AVERAGE INDEX

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

HARMONIZED SALES TAX

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.

On April 1, 2013, the Harmonized Sales Tax came into effect in Prince Edward Island, while British Columbia returned to the Provincial Sales Tax and the Goods and Services Tax.
