

Consumer Price Index

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: JANUARY 2016

CONSUMER PRICE INDEX (2002=100)

HIGHLIGHTS

British Columbia's consumer price index (CPI) climbed 2.3% (*unadjusted*) in January, compared to the same month of the previous year. This marks an up-tick in the year-over-year rate of inflation since December, when it was 1.9%.

According to Statistics Canada, the overall annual inflation rate of 2.3% declines to 1.6% when food is excluded from the index.

The overall cost of food rose by 5.5% since January of last year, with the cost of both groceries purchased from stores (+7.1%) and meals purchased from restaurants (+2.3%) increasing. The rise in grocery prices was mainly due to significant increases in the cost of fresh vegetables (+26.2%), fresh fruit (+9.0%), and fish and other seafood (+8.5%).

The cost of shelter (+0.4%) increased slightly in January, with costs for both renters (+0.8%) and home owners (+0.6%) going up. Within the shelter category, the cost of electricity increased (+5.9%) since January 2015, while the price of both piped gas (-17.8%) and fuel oil and other fuel (-14.6%) fell.

The transportation index (+3.4%) increased since January 2015, with the cost of both private transportation (+3.7%)

and public transportation (+1.6%) going up. The cost of gasoline increased by 5.3%, marking the second month in a row that gas prices have gone up.

The overall cost of clothing and footwear increased (+1.8%) in January, with the cost of clothing going down (-0.6%) and footwear (+7.0%) increasing.

Compared to a year ago, consumers paid more for recreation, education & reading (+3.1%), alcoholic beverages and tobacco products (+2.3%), household operations and furnishings (+1.2%), and health & personal care (+0.9%).

Consumer prices rose in Vancouver (+2.5%), above the rate of inflation for British Columbia as a whole, while in Victoria the increase in prices (+1.9%) was lower than that for B.C.

Canada's CPI rose 2.0% (*unadjusted*) in January. Provincial inflation rates ranged from a high of 2.4% in both New Brunswick and Newfoundland and Labrador, to a low of 1.6% in Quebec.

Note: Statistics Canada will release the January Consumer Price Index on March 18, 2016.

TERMS AND DEFINITIONS

BASE EFFECT

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

TWELVE-MONTH PERCENT CHANGES

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

ANNUAL AVERAGE INDEX

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Vancouver	122.2	1.3	1.2
Victoria	118.8	1.2	1.1

Consumer Price Index – continued...

LATEST TWELVE-MONTH AVERAGE INDEX

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

HARMONIZED SALES TAX

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.

On April 1, 2013, the Harmonized Sales Tax came into effect in Prince Edward Island, while British Columbia returned to the Provincial Sales Tax and the Goods and Services Tax.
