Reference date: February 2018

Released: March 23, 2018

Consumer Price Index (2002=100)

Highlights

British Columbia's consumer price index (CPI) rose 2.8% (*unadjusted*) in February compared to the same month of the previous year. The year-over-year rate of inflation was up 0.7% from January.

According to Statistics Canada, the overall annual inflation rate increases to 2.9% when food is excluded from the index, but declines to 2.5% when energy is excluded.

The overall cost of food climbed 2.0% since February of last year. The cost of groceries purchased from stores went up (+1.5%), with the cost of meals purchased from restaurants also increasing (+2.8%) during the same time period. Within the food category, the highest rise in prices was for fresh vegetables (+11.1%), followed by meat (+2.2%) and fresh fruit (+1.3). Prices fell in February for non-alcoholic beverages (-5.6%), coffee and tea (-1.4%), and fish and other seafood (-1.3%).

The cost of shelter went up in February (+3.5%), with prices for both renters (+1.4%) and home owners (+4.7%) rising. Within the shelter category, there was increases in the cost of fuel oil and other fuel (+10.8%), and electricity (+3.2%) in February, while piped gas (-7.1%) decreased.

The transportation index rose 4.2% since February 2017, with the price of both private transportation (+3.6%) and public transportation (+8.0%) going up.

There was an increase in the price of gasoline (+12.5%) since the previous February, and travellers paid more for inter-city public transportation (+10.4%) compared to last year.

The overall cost of clothing and footwear rose slightly (0.1%) in February as an increase in the price of clothing (+0.7%) offset a decrease for footwear (-2.5%).

Compared to a year ago, consumers paid more for alcoholic beverages and tobacco products (+3.6%), household operations and furnishing (+2.3), health and personal care (+2.2%), and recreation, education and reading (+1.2%). Within these categories, some items with significant price increases include reading material and other printed matter (+5.4%), cigarettes (+5.3%), and beer purchased from stores (+4.1%).

Consumer prices rose in both Vancouver (+3.3%) and Victoria (+2.1%) in February.

Canada's CPI rose 2.2% (*unadjusted*) in February. The rate of inflation in B.C. (+2.8%) ranks third highest amongst the provinces, trailing Prince Edward Island (+3.0%) and Saskatchewan (+2.5%). The inflation rates for the other provinces ranged from a high of 2.7% in New Brunswick to a low of 1.5% in Quebec.

Note: Statistics Canada will release the March Consumer Price Index on April 20, 2018.

2002=100	All-Items Index February 2018	% Change from	
		January 2018	February 2017
Canada	132.5	0.6	2.2
BC	127.0	0.7	2.8
Vancouver	129.6	0.7	3.3
Victoria	124.5	0.9	2.1
Canada-X ¹	129.2	0.3	1.3
BC (excluding energy)	124.3	0.7	2.5

¹ Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC and Canada Inflation Trend

(% change, same month of previous year)

Canada	130.8	1.6	1.6
BC	125.5	2.1	2.1
Vancouver	127.9	2.3	2.2
Victoria	123.4	1.9	1.9

Terms and definitions

Base effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

Twelve-Month Percent Changes

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Harmonized Sales Tax

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.

On April 1, 2013, the Harmonized Sales Tax came into effect in Prince Edward Island, while British Columbia returned to the Provincial Sales Tax and the Goods and Services Tax.
