Reference date: April 2019

Released: May 15, 2019

Consumer Price Index (2002=100)

Highlights

British Columbia's consumer price index (CPI) was 2.7% higher (*unadjusted*) in April 2019 than in the same month of 2018. On a monthly basis, the rate of inflation rose 0.4% from March 2019.

The overall annual inflation rate increases by 2.4% when food and energy are excluded from the index.

The cost of food climbed 3.2% since April of 2018. Prices for groceries purchased from stores (+3.4%) and meals purchased from restaurants (+2.9%) were both up from the previous year. Within the food category, the highest rise in prices was for fresh vegetables (+14.1%), followed by coffee and tea (+8.1%), fresh fruit (+4.1%), and meat (+3.3%).

The cost of shelter continued to climb in April (+2.7%), with prices for both renters (+2.7%) and home owners (+2.5%) rising. Within the shelter category, there were increases in the cost of utilities, including piped gas (+10.4%), electricity (+1.6%), and fuel oil and other fuel (+0.4%).

The overall cost of clothing and footwear was also on the rise (+1.9%) compared to April 2018, although the price for footwear (+2.7%) increased at a higher rate than that for clothing (+1.6%).

The transportation index rose 4.2% in April, with the price of both private (+3.5%) and public (+5.1%) transportation going up. The price of gasoline (+6.3%)

climbed substantially since April of last year, and public transportation passengers paid more to travel within (+2.5%) and between (+5.7%) cities.

Compared to a year ago, consumers paid more for recreation, education and reading (+3.0%), alcoholic beverages and tobacco products (+2.6%), health and personal care (+1.6%) and household operations and furnishing (+0.5%). Within these categories, items with significant price increases include beer purchased from stores (+5.4%), recreation (+3.7%), and liquor purchased from stores (+2.7%). The only categories to see a price decrease over April 2018 was reading material and other printed matter (-2.3%) and non-alcoholic beverages (-3.2%).

Consumer prices rose in both Vancouver (+2.5%) and Victoria (+2.7%) in April compared to the same month of 2018.

Canada's CPI was up 2.0% (*unadjusted*) in April. The rate of inflation in British Columbia (+2.7%), Manitoba (+2.3%) and Saskatchewan (+2.3%) were highest among the provinces.

Note: Statistics Canada will release the April Consumer Price Index on June 19, 2019.

2002=100	All-Items Index April 2019	% Change from	
		March 2019	April 2018
Canada	136.0	0.4	2.0
BC	131.2	0.4	2.7
Vancouver	133.6	0.2	2.5
Victoria	128.6	0.2	2.7
Canada-X ¹	133.5	0.0	1.5
BC (excluding energy)	127.7	-0.1	2.6

¹ Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC and Canada Inflation Trend

(% change, same month of previous year)

2002=100	Latest 12-month Average Index (ending in April 2019)	Latest 12-month Average % Change	2018 Annual Average % Change
Canada	134.1	2.1	2.3
BC	129.4	2.7	2.7
Vancouver	132.0	2.7	2.9
Victoria	127.0	2.6	2.4

Terms and definitions

Base effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

Twelve-Month Percent Changes

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Harmonized Sales Tax

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.

On April 1, 2013, the Harmonized Sales Tax came into effect in Prince Edward Island, while British Columbia returned to the Provincial Sales Tax and the Goods and Services Tax.
