Released: June 19, 2019

Consumer Price Index (2002=100)

Highlights

British Columbia's consumer price index (CPI) was 2.6% higher (*unadjusted*) in May 2019 than in the same month of 2018. On a monthly basis, the rate of inflation rose 0.5% from April 2019.

The overall annual inflation rate increases by 2.5% when food and energy are excluded from the index.

The cost of food climbed 3.4% since May of 2018. Prices for groceries purchased from stores (+3.7%) and meals purchased from restaurants (+2.7%) were both up from the previous year. Within the food category, the highest rise in prices was for coffee and tea (+13.3%), followed by fresh vegetables (+12.7%), fish and other seafood (+4.5%), and non-alcoholic beverages (+4.3%).

The cost of shelter continued to climb in May (+2.5%), with prices for both renters (+3.1%) and home owners (+3.1%) rising. Within the shelter category, there were increases in the cost of utilities, including piped gas (+10.4%) and electricity (+1.6%), while fuel oil and other fuel (-0.4%) saw a price decrease in May.

The overall cost of clothing and footwear was also on the rise (+0.8%) compared to May 2018, with the price for footwear (+1.1%) increasing at a higher rate than that for clothing (+0.4%).

The transportation index rose 4.7% in May, with the price of both private (+3.8%) and public (+7.1%)

transportation going up. The price of gasoline (+3.8%) climbed since May of last year, and public transportation passengers paid more to travel within (+2.5%) and between (+8.4%) cities.

Compared to a year ago, consumers paid more for alcoholic beverages and tobacco products (+1.9%), household operations and furnishing (+1.9%), recreation, education and reading (+1.8%), and health and personal care (+1.7%). Within these categories, items with significant price increases include beer purchased from stores (+4.9%), recreation (+2.6%), and household furnishings (+2.5%). The only category to see a price decrease over May 2018 was reading material and other printed matter (-2.3%).

Consumer prices rose in both Vancouver (+2.7%) and Victoria (+2.6%) in May compared to the same month of 2018.

Canada's CPI was up 2.4% (*unadjusted*) in May. The rate of inflation in Manitoba (+2.8%), British Columbia (+2.6%), Ontario (2.4%), and Quebec (+2.4%) were highest among the provinces.

Note: Statistics Canada will release the April Consumer Price Index on July 17, 2019.

2002=100	All-Items Index May 2019	% Change from	
		April 2019	May 2018
Canada	136.6	0.4	2.4
BC	131.8	0.5	2.6
Vancouver	134.4	0.6	2.7
Victoria	129.3	0.5	2.6
Canada-X ¹	134.1	0.4	2.1
BC (excluding energy)	128.3	0.5	2.6

¹ Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

BC and Canada Inflation Trend

(% change, same month of previous year)

2002=100	Latest 12-month Average Index (ending in May 2019)	Latest 12-month Average % Change	2018 Annual Average % Change
Canada	134.4	2.2	2.3
BC	129.7	2.7	2.7
Vancouver	132.3	2.7	2.9
Victoria	127.3	2.6	2.4

Terms and definitions

Base effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

Twelve-Month Percent Changes

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Harmonized Sales Tax

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.

On April 1, 2013, the Harmonized Sales Tax came into effect in Prince Edward Island, while British Columbia returned to the Provincial Sales Tax and the Goods and Services Tax.
