

An Update from BC Ferries

Hello Sunshine Coast Residents,

We have concluded the first phase of consultation and while I shared some key themes that emerged through this process last month, I am pleased to now be able to share the summary report. To see the full summary report, please visit my Langdale project page at bcferries.com/about/terminal-development-planning.

BC Ferries provided a number of ways for people to provide input during this process — from mobile booths, to a public information session and an online survey. We received input from more than 200 visitors at our mobile booth, 2,154 completed online surveys, 28 attendees to our information session and talked with 30 stakeholders.

We submitted the summary report to the Sunshine Coast Regional District in mid-November and we expect the report to go to the second reading of the rezoning process on January 11. For Phase 2 of our consultation, we will present some of the terminal development design drawings for public review and input, and report back on how, and to what extent, we have been able to incorporate the Phase 1 input. A timeline of the project is shown below.

My team continues to progress on the preliminary design while considering the key themes that emerged from the public consultation. These themes include improved foot passenger loading and offloading, improved waiting areas, universal accessibility and parking.

The design team has been considering opportunities such as the best way to efficiently heat and cool the buildings, how to incorporate new construction material technologies to reduce the cleaning and maintenance requirements for the terminal and how to undertake construction with the least possible impact to the environment.

If you have any questions about the process we have undertaken so far, or the design process that lies ahead, please don't hesitate to contact me directly at michael.pearson@bcferries.com. Also let me know if you find these updates helpful, and any questions you have that I can address next time I write.

Thank you,

Mike

Senior Project Manager, BC Ferries

What is happening?	Details	When?
• Complete preliminary design options	• Includes buildings, retail space, parking areas and the pick-up and drop-off areas	Winter 2017/2018
• Submit application for approval to the BC Ferries Commissioner	• Required for project scope, schedule and budget	Early 2018
• Further public engagement and information sessions on detailed design construction	• Provides participants the opportunity to stay up-to-date on the project and provide input	Early 2018
• Complete detailed engineering design	• Finalize design drawings and issue construction tender packages	Fall 2018
• Construction expected to begin at terminal	• Begin construction of buildings, retail space, parking areas and the pick-up and drop-off areas	Early 2019
