

This report summarizes all accidental, traffic-related motor vehicle incident (MVI) deaths that occurred between January 1, 2008 and December 31, 2018.

Inclusion Criteria: For BC Coroners Service (BCCS) statistics, a traffic-related MVI is one occurring on a public "highway", as defined in the Motor Vehicle Act. This definition encompasses any roadway intended for or used by the public for the passage of vehicles, and any private place to which the public has access or is invited (e.g., for parking or vehicle servicing). Private driveways and forest service roads are excluded, except where the forest service road is open to public use. Incidents involving off-road vehicles, industrial vehicles, and farm vehicles are included when occurring on public highways, but excluded when occurring off-road or on a worksite.

Caveats: As the BCCS operates in a live database environment, the data are considered preliminary and subject to change. These data were compiled by date of death, which may differ from the date of injury. In some cases, the death may occur months or years subsequent to injury. These statistics may vary from those reported by other agencies because of differences in data definitions or reporting standards.

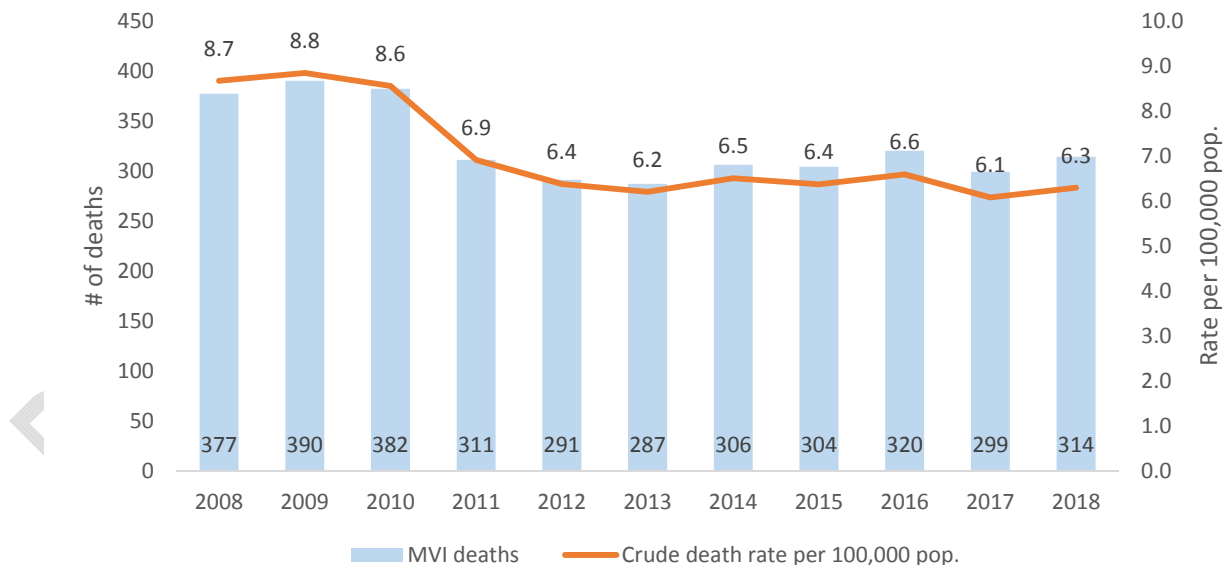

Fig. 1. MVI Deaths and Crude Death Rate per 100,000 Population, 2008-2018¹

I. Overview

- In 2018, 314 British Columbians died in motor vehicle incidents. The average annual number of MVI deaths in B.C. between 2008-2018 was 326.
- In 2018, the crude MVI death rate was 6.3 per 100,000 population. The average annual rate was higher from 2008-2010 (8.7) than from 2011-2018 (6.5).
- Sixty-one percent (61%) of decedents were drivers or passengers in personal vehicles. Eighteen percent (18%) were pedestrians and 11% were motorcyclists. (Fig. 2).
- More than two-thirds of decedents (69%) were male (Fig. 3).
- Between 2008-2018, the months with the highest average annual number of pedestrian deaths were November (7.6) and December (7.1). For other road users, the average annual number of deaths per month was highest for August (31.1) and July (29.5). (Fig. 4).
- Approximately one-third of all MVI deaths (34%) between 2008-2018 occurred in the Interior Health Authority region (Fig. 5).

II. Drug and Alcohol Involvement

- Based on data available from 2008 to 2016, one-third of deaths (34%) resulted from MVIs involving drugs and/or alcohol and
- Alcohol and/or drug involvement was identified as a contributing factor in 52% of deaths of 19-29 year olds and 51% of deaths of 30-39 year olds (Fig. 6).

III. Restraint Use

- Based on data available from 2011 to 2016, 29% of decedent drivers and passengers were not wearing a seat belt (Fig. 7) and
- Seventy-one percent (71%) of females were using a restraint, vs. 49% of males (Fig. 8).

Table 1. MVI Deaths by Decedent Role*

	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018

No	59	56	63	47	51	40
Unknown ⁴	19	18	15	24	29	45
Total	195	175	173	186	171	174

Note: Restraint use data for 2017 are not yet available.

■ Restraint used ■ No restraint used ■ Unknown

Fig. 7. Driver and Passenger Restraint Use, 2011-2016⁴

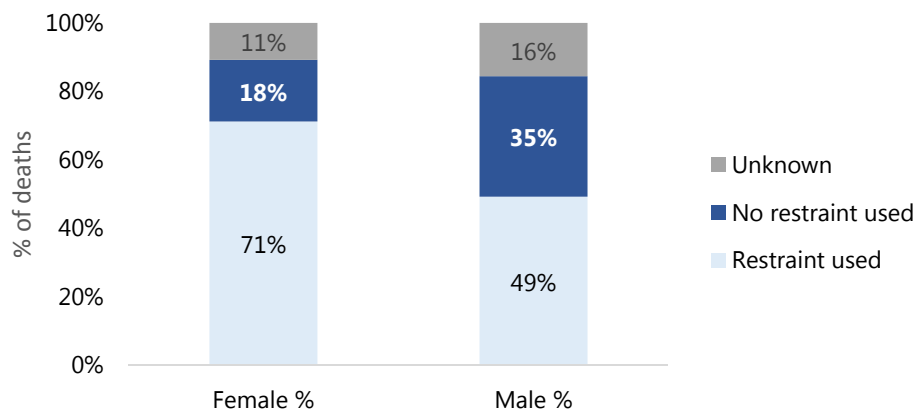

Fig. 8. Driver and Passenger Restraint Use by Sex, 2011-2016⁴

Notes

1. Population estimates were taken from <https://www2.gov.bc.ca/gov/content/data/statistics/people-population-community/population/population-estimates> ('B.C. and Other Provincial and Territorial Populations: 1971-2017 (July 1)'); 'Highlights and summary table for 2018').
2. See **Appendix B**, below, for a map of health authorities.
3. Health authority is derived from injury township. Death township is used in cases of unknown or out-of-province injury township. Administrative region is used in rare cases where both injury and death township are out of province.
4. 'Unknown' includes cases still under investigation and cases where restraint use could not be determined.

Appendix A

Decedent Role Definitions

Driver: An operator of a non-commercial motor vehicle (excluding a motorcycle or moped).
Motorcycle and moped drivers are coded under *Motorcycle, Moped*.

Passenger: An occupant of a non-commercial motor vehicle other than the driver.
Motorcycle and moped passengers are coded under *Motorcycle, Moped*.

Pedestrian: A person involved in a motor vehicle incident who, at the time of the incident, was on foot, sitting down, or lying down on a public highway or a parking lot used by the public. Includes skateboarders, longboarders, and rollerbladers.

Motorcycle, Moped: A driver or passenger of a motorcycle or moped.

Pedal Cyclist: A user of a road transport vehicle operated by pedals.

Comm. Driver: An operator of a commercial motor vehicle. Bus drivers are coded under *Bus*.

Motorized Wheelchair: A user of a motorized wheelchair.

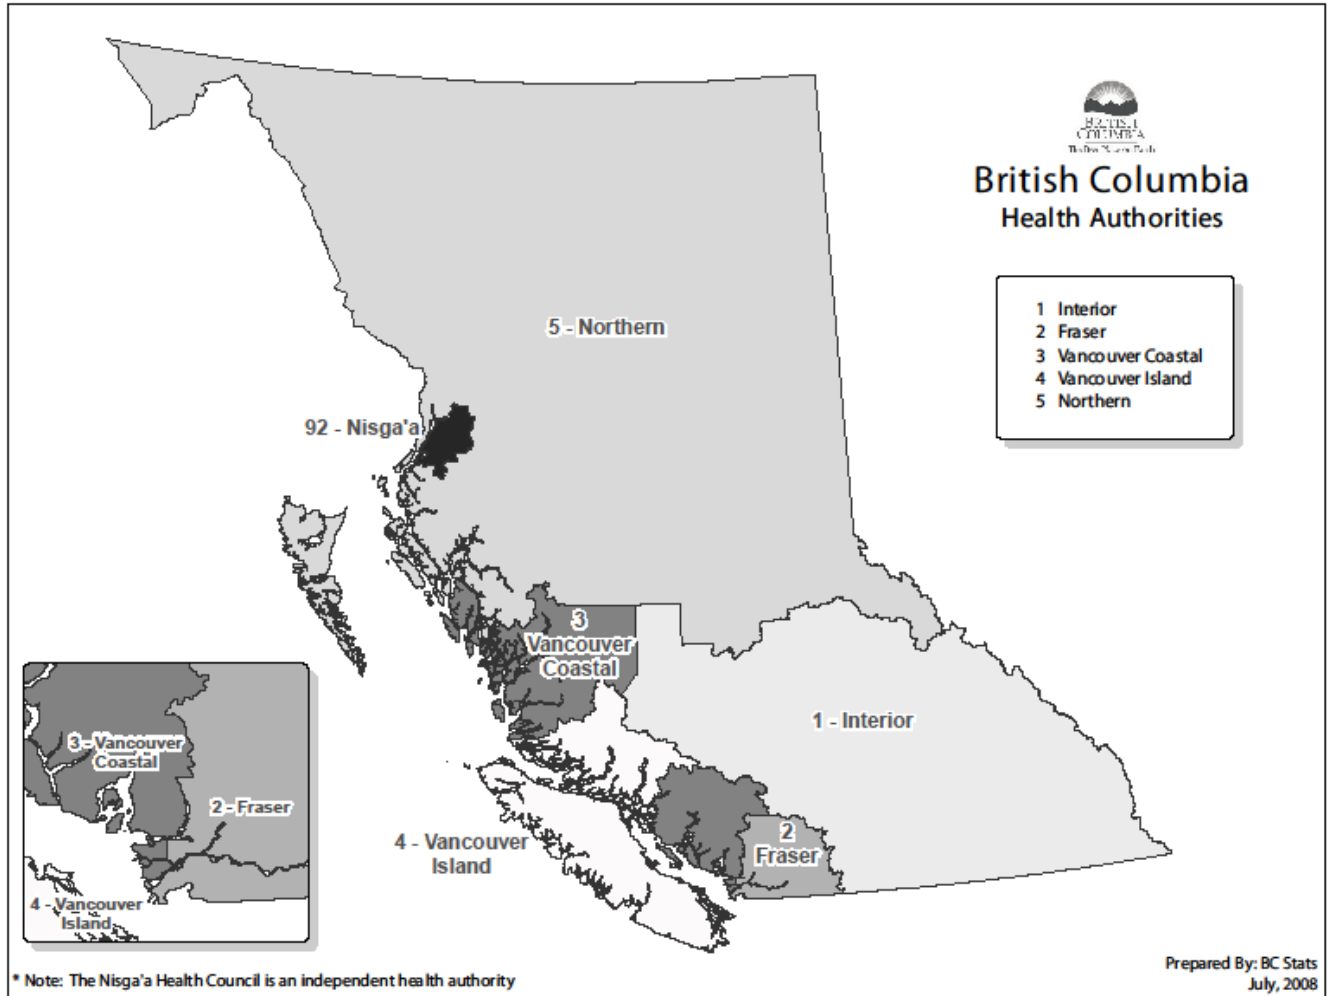

Comm. Passenger: An occupant of a commercial motor vehicle, other than the driver. Bus passengers are coded under *Bus*.

Bus: A driver or passenger of a bus.

Other: 'Other' includes:

- Road users whose role in the motor vehicle incident (e.g. driver vs. passenger) could not be determined. In these cases, injury generally occurred months or years prior to death.
- Drivers and passengers of off-road vehicles (e.g. ATVs, tractors) involved in motor vehicle incidents on public highways
- Car surfers
